# ECON 238 ECONOMICS OF SPORTS

WINTER 2024, TR, 7:00 - 8:15 PM

**Shaun  
Augustin**  
INSTRUCTOR

PREREQUISITES

ECON 100 or  
15 credit hours

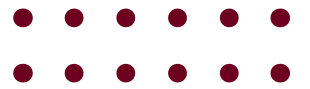

**ECON 238** examines how the business/economics impacts professional team sports. We explore important questions like:

- How does market size/profits influence the on-field results?
- Do things like salary caps or luxury taxes improve competitive balance in professional team sports?
- What factors influence how much athletes in pro team sports earn? Should amateur athletes in college sports be paid?
- Why do governments subsidize stadiums/arenas for professional team sports?

# ECON 253 ECONOMIC ISSUES IN THE CANADIAN HEALTH CARE SYSTEM

WINTER 2024, ONLINE

**Harminder Guliani**

INSTRUCTOR

**PREREQUISITES**

ECON 100 or 15 credit hours

**Economics can provide great insights into these interesting health care issues.**

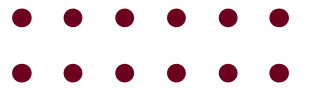

- Are you concerned about rising health care costs and longer wait times for medical procedures?
- Should we allocate resources to a health program and procedure or to another social program?
- Would you like to know more about Canadian health care, its financing, delivery and the role of private sector?
- How does Canada's healthcare system perform relative to other advanced countries?

# ECON 275 ENERGY ECONOMICS

WINTER 2024, MWF, 10:30 - 11:20 AM

Carmen Dybwad  
INSTRUCTOR

PREREQUISITES

ECON 100 or 15 credit hours

## ENERGY CRISIS

Do these words grab your attention? They should, because nothing signals a greater economic upset than them. Why?

Because, nothing moves without energy; nothing grows without energy; in short, nothing happens without energy.

Energy is one of the most important inputs required for economic development, growth, and health.

What will you learn in **ECON 275**?

We will explore not just the supply and demand for energy, but also the impact that our energy choices have on the environment, geopolitics, and domestic laws and regulations.

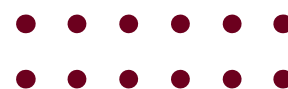

Remember energy is in everything!

# ECON 308 ECONOMIC GROWTH

WINTER 2024, TR, 2:30 – 3:45 PM

**Samuel Gamtessa**  
INSTRUCTOR

## PREREQUISITES

ECON 202 and MATH 103 (or 110)  
or permission of Department Head

Using both neoclassical and new theories of growth, this course explores key questions like:

- What role do physical, human, and natural capital play in economic growth?
- Is globalization good for economic growth?
- Is population growth bad for economic growth?
- Could political instability, corruption, and undemocratic governance explain the dismal growth of some countries?
- Could poor countries ever catch up with rich countries' standard of living?

University  
of Regina

Department  
of Economics

# ECON 311 ECONOMICS OF DEVELOPING COUNTRIES

WINTER 2024, MW, 1:00 – 2:15 PM

**George Hartner**

INSTRUCTOR

## PREREQUISITES

ECON 202 or ECON 211

Would you like to learn about challenges facing developing countries and the world in their attempts to improve living standards and eradicate poverty?

**Econ 311** offers practical solutions to these challenges by exploring questions like:

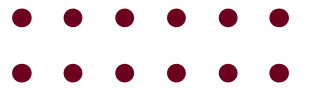

- Why have some countries made great strides in eradicating extreme poverty while others have failed?
- Has colonization and past exploitation ensured that some countries remain poor?
- Has globalization and market liberalization actually alleviated poverty or kept countries poor?
- Have rich nations, world institutions, and transnational corporations further entrenched poverty in less developed nations?

University

Department  
of Economics

# ECON 342

## GLOBAL FINANCIAL MARKETS

WINTER 2024, MW, 4:30 – 5:45 PM

**George Hartner**

INSTRUCTOR

PREREQUISITES

ECON 202

Would you like to understand how economies work at an international level?

Would you like to gain some practical skills in conducting international macroeconomic analysis and forecasting?

Then, take **Econ 342** to further explore:

- Foreign exchange markets
- International banking
- Foreign exchange derivatives
- Currency speculation
- Alternative exchange-rate regimes
- Regulation of global financial markets
