Information for Prospective Graduate Students
Letter from the Head, Department of Psychology (2016-2017)

Dear Graduate School Applicant:

Thank you for your interest in our graduate programs in psychology at the University of Regina. We offer a fully accredited program leading to the Ph.D. in Clinical Psychology, as well as an M.A. and a Ph.D. program in Experimental and Applied Psychology. Our graduate programs are described in the following pages.

We look forward to receiving your application.

Richard MacLennan Ph.D.
Head, Department of Psychology

Graduate Program Co-ordinators

Office Administrators

## Living in Saskatchewan

Residents of Saskatchewan enjoy a high standard of living. Saskatchewan is rich with cultural heritage, has an excellent network of national and provincial parks, and has clean air that is smog free. The landscape varies tremendously from the vast wheat fields in the South to the dense trees and thousands of lakes that make up the Northern Forest.

Saskatchewan has been a leader in health care for over 60 years. Saskatchewan pioneered universal hospital care insurance in the 1940’s and comprehensive coverage in the 1960’s. The province is now concentrating on a wellness model that promotes preventive care and innovative service delivery with a system of health regions across the province. Regina is home to three major healthcare facilities: The Regina General Hospital, Pasqua Hospital and the Wascana Rehabilitation Centre.

The climate is relatively diverse across four distinct seasons and residents enjoy more hours of sunlight than most other places in North America. The temperature shows considerable fluctuation over the course of the year. The average temperature is -11 degrees Celsius for the winter and +23 degrees Celsius for the summer.

## The City of Regina

Regina, the capital of Saskatchewan, is located in south central Saskatchewan, midway between Calgary, Alberta and Winnipeg, Manitoba. Regina is well known as one of the sunniest places in Canada with a metropolitan area population of approximately 232,090 (2014 statistic).

Regina is home to the beautiful Legislative Building, and residents benefit from an abundance of parks, pathways, cultural events, organised sports, and excellent sporting facilities. Regina’s park system features over 100 parks and is crowned by the Wascana Centre, a 930-hectare park that includes a lake, a picnic island, a marina, and waterfowl park and display ponds. Wascana Centre is one of the largest urban parks in North America and has no counterpart in Canada. Major annual events include: the Regina Dragon Boat Festival, the Regina Folk Music Festival and the intercultural celebration, Mosaic. Winter sports are also popular including, for example, curling, hockey, and skiing. Regina is also home to several theatre groups, the longest continually running symphony in Canada and many fine as well as ethnically diverse restaurants.

The cost of living in Regina is very reasonable compared to other major Canadian cities. Affordable arrangements for student accommodations include a variety of student housing options that are available on campus. As of September 2016 cost of on campus accommodations ranges between $2,910 (single room) and $4,745 (one bedroom apartment) per semester depending on the nature of the accommodation and the options selected. Off-campus unfurnished one bedroom apartments near the University typically rent for approximately $1,100 per month. Less expensive rental accommodations are available throughout Regina. For additional information about on-campus housing, go to: [http://www.uregina.ca/arts/english/graduate-studies/prospective-students/student-housing.html](http://www.uregina.ca/arts/english/graduate-studies/prospective-students/student-housing.html).
The University of Regina is a young and dynamic institution. Although we achieved independence only in 1974, we have grown to ten faculties and many departments, which have established reputations for excellence and innovative programs leading to Bachelor’s, Master’s, and Doctoral degrees. As well, a variety research centres and institutes on campus enhance teaching and research opportunities.

Our main campus is located in the heart of Wascana Centre, a unique 930-hectare development dedicated to education, recreation, culture, and the seat of government. The new Campus and our historic ‘old’ campus provide an attractive work and study environment for our students, faculty, and staff.

The University of Regina has grown rapidly over the past few years. The annual operating budget is approximately $215 million. Enrollment has exceeded 14,000 full and part-time students with over 1,400 faculty and staff. Over the last decade, the University has achieved dramatic increases in its research revenues from external sources. Research efforts cover an impressive array of topics such as health (including anxiety, stress and pain as well as issues related to health equity), social justice & community safety, informatics, and water, environment & clean energy.

In recent years, the University has enjoyed renewed physical growth. This consisted of the addition of several new buildings including the multi-million dollar a new 600 bed residence with indoor parkade, a two-storey addition and renovation to the Education Building, an impressive home for the First Nations University of Canada, two new residences, a state of the art Kinesiology and Health Studies complex, a major laboratory building addition and new Regina Research Park buildings that have led to synergies and research partnerships with industry and government.

Much of this information is derived from the University of Regina’s official web-site at www.uregina.ca.

Psychology Department

The Department of Psychology offers M.A. and Ph.D. degrees in Clinical Psychology as well as Experimental and Applied Psychology (EAP). The Master’s degree programs offered in the Department are considered as preparatory for further work at the doctoral level. In all cases, the graduate programs offered in the Department of Psychology are subject to the general regulations of the Faculty of Graduate Studies and Research.

For a relatively small Department, a rather broad range of interests is reflected in the scholarly activities of psychology faculty members (see section on faculty interests); and an even broader range of research activities is reflected in the products of our graduate students (see list of recent faculty publications and student theses). The size of the program allows students to receive a great deal of individual attention from faculty. At the undergraduate level, the Department of Psychology has the largest number of majors in the university. Our current complement of graduate students stands at 36 clinical and 21 EAP students.

Admission Requirements

Fully qualified acceptance into the M.A. program requires an undergraduate degree in psychology. We are seeking individuals with an honours degree or honours equivalent. Admission to the Ph.D. program is traditionally contingent upon a Master’s degree in Psychology. Fully qualified acceptance into either stream of doctoral studies requires previous academic preparation equivalent to that comprising the Master’s degree programs offered in the Department.

Financial Support

The department strives to ensure that all of its graduate students have access to a satisfactory level of funding support. This is typically achieved through a combination of sources of support described in this section. During 2014-2015 the average levels of funding (over 12 months) obtained by students in the Clinical program were $31,629 at the Master's level and $32,175 at the doctoral level prior to pre-doctoral residency. These levels of average funding have been relatively stable in recent years. Students in the EAP program are also funded through a combination of sources with most students receiving funding from supervisors’ grants. A high proportion of our graduate students are funded through national scholarships.

A number of scholarships ($6,000 [MA] - $7,000 [PhD] per semester), teaching assistantships for 2015 - $2,463.14[MA]; for 2015 - $2,584.62 [PhD] per semester including vacation pay), and teaching fellowships (2015 - $6,641 per semester including vacation pay) are available through the Faculty of Graduate Studies and Research. Additional internally administered scholarships and fellowships are also available and students are encouraged to review these through the Faculty of Graduate Studies and Research website at [http://www.uregina.ca/gradstudies/scholarships/index.html](http://www.uregina.ca/gradstudies/scholarships/index.html).

Fully-qualified students (see Faculty of Graduate Studies and Research Calendar) are eligible for University scholarships, assistantships, and fellowships. Some additional teaching assistantships are available from the Faculty of Arts, and individual faculty members often also support their own graduate students with research assistantships from their grants.

Students are strongly encouraged to seek additional funding from external sources. There are several national granting agencies that support graduate research through scholarships such as the Social Sciences and Humanities Research Council (SSHRC), the Natural Sciences and Engineering Research Council (NSERC), and the Canadian Institutes of Health Research (CIHR), among others. The Faculty of Graduate Studies and Research (FGSR) has offered financial enhancement packages for students who hold CIHR,
NSERC and SSHRC awards. For more information on these enhancement packages please review the FGSR website [http://www.uregina.ca/gradstudies/about-us/index.html](http://www.uregina.ca/gradstudies/about-us/index.html). Both EAP and Clinical students have achieved a great deal of success earning prestigious national scholarships. These awards have ranged in value from approximately $17,000 to $50,000 per year. Our students have also been highly successful in winning institutional scholarships and other awards such as the Governor General’s Medal for best graduate thesis at the University of Regina.

**Application Procedures**

If what we have to offer appears to mesh with your goals, you can obtain the application or apply online ([http://www.uregina.ca/gradstudies/future-students/application-process.html](http://www.uregina.ca/gradstudies/future-students/application-process.html)). There is a non-refundable application fee of $100.00 for all applicants; please note that if your file is not complete by January 15th you cannot be considered for the fall of that year.

A complete file consists of:

a) a completed application form  
b) your transcripts  
c) your GRE scores (verbal, quantitative, analytical are required; the Psychology subject test is optional)  
d) two letters of reference  
e) an application statement detailing your background, goals, and research interests including faculty members whom you would be interested in having as research supervisors.

Over the past several years, most students admitted into our clinical programs on average have had combined GRE scores (verbal, quantitative, analytical) above the 68th percentile and an average grade of ~85%. It is unusual for students to be accepted into the program with GRE scores (verbal, quantitative, analytical, and psychology) below the 40th percentile or with an academic average lower than 80%.

With respect to the letter of intent, you must provide a short written statement detailing your background, your interests and why you think that our program is suited to your goals. A form letter designed to provide general information to a number of graduate schools may well be inadequate for our purposes. After you have reviewed faculty members’ interests you should contact a faculty member who shares your interest and discuss potential supervision.

Applications must be complete and received in the Faculty of Graduate Studies and Research office, North Tower Residence Room 110.2, University of Regina, Regina, Saskatchewan, S4S 0A2. Tel: (306) 585-4161 by January 15th.

The department values diversity and encourages applications from all qualified women and men, including aboriginal peoples, persons with disabilities, and members of visible minorities.

We hope that the information we have provided in this package will help you to make an informed decision and we thank you for your initial interest in our Department.
Other Student Services
The University of Regina, Department of Counselling Services offers confidential counselling services to any University of Regina student. For more information contact Counselling Services at:

Riddell Centre, Room 251
University of Regina
Regina, Saskatchewan S4S 0A2
Telephone: (306) 585-4491
Fax: (306) 585-5172
http://www.uregina.ca/student/counselling/

Instructional areas used by the Department of Psychology are wheelchair accessible. Assistance can be arranged with parking, special arrangements with instructors and technologies to assist students. Other services are also available. For more information please contact the University’s Co-ordinator of Special Needs (306 585-4631) or Room 251, Dr. William Riddell Centre.
Clinical Psychology Program

Accreditation
The Ph.D. program in Clinical Psychology has been fully accredited by the Canadian Psychological Association (CPA) since the 2003-2004 academic year. During our February 2015 CPA site-visit, our program was re-accredited for seven years; until 2021-2022. Information regarding CPA accreditation can be obtained by contacting the CPA Accreditation Office at:
Accreditation Office
Canadian Psychological Association
141 Laurier Avenue West, Suite 702
Ottawa, ON K1P 5J3
CPA website: www.cpa.ca

Mission
The mission of the Clinical Psychology Program at the University of Regina is to train our students in the scientist-practitioner tradition so that they will be prepared to work as either a researcher, teacher or practitioner or all of these within a variety of settings (academic, clinical, or research setting).

Philosophy/Principles
In keeping with the motto of the University of Regina as “One Who Serves” the philosophy of the clinical program in the Department of Psychology is characterized by a commitment to our responsibility to society and to our responsibility to the profession. In fulfilling these responsibilities, we endeavor to ensure that our students are not only knowledgeable and competent in both delivery of services and in the conduct of creative research, but that they also endorse an ethic of care. Underlying these skills and attitude acquisitions is the principle of integrity in relationships, which, in turn, is characterized, by respect for the dignity, and welfare of others.
Values
The following values are inherent in the clinical program’s achievement of our mission:

- Excellence
- Scholarship
- Leadership
- Innovation & Creativity
- Integration of Science and Practice
- Generalist Training
- High Ethical Standards
- Responsiveness to Society
- Adherence to National Standards and Policies Concerning Training
- Compassion
- Diversity
- Respect & Integrity
- Professional Satisfaction
- Collegiality
- Collaboration
- Productivity and Effort
- Accountability

Theoretical Orientations
Students have opportunities through work with faculty or community supervisors to pursue various interests in clinical psychology including clinical health psychology. Opportunities exist to work with children, adults or seniors in a variety of settings such as mental health, psychiatric, acute care, rehabilitation, counselling or forensic settings. Exposure to a variety of theoretical orientations is possible, including cognitive-behavioural, experiential, humanistic and interpersonal. Exposure to neuropsychology is also available.

Professional and Research Interests
A rather broad range of interests is reflected in the professional and scholarly activities of the Clinical Psychology Faculty members (see section on faculty interests). Research expertise of faculty fall both within the quantitative as well as qualitative domain.

Goals/Objectives
Research Goals: The program strives to prepare students to have an understanding and respect for both basic and applied research. The faculty of the clinical program subscribe to the views that: (a) the clinical scientist, who is competently-trained in practice makes the most significant contributions to clinical research; and (b) the practitioner who is familiar with the body of basic and applied research, and who can critically evaluate research findings makes the soundest contributions to society and the profession.

Research Objectives: To meet the above goals, students take courses in research methods and statistics. They also obtain experience in program evaluation (e.g., though participation in the Canadian Evaluation Society Annual Case Competition or completion of a program evaluation proposal as part of comprehensive exams). Research is incorporated into clinical courses and is a component of reading required for clinical training. Furthermore, students complete both an M.A. and Ph.D. thesis and have the opportunity to participate in faculty research projects.
Clinical Practice Goals: Students will be competent in: (a) assessment, (b) diagnosis, (c) evaluation; (d) consultation; and (e) intervention. In each area, students will gain competency in the development and maintenance of interpersonal relationships, including competency in working with diverse groups. It is recognized, however, that the field of clinical psychology is diverse and no single practitioner can master all areas. Students will be taught to recognize their skills and when appropriate refer to colleagues who have the requisite skills.

Clinical Practice Objectives: Students complete course work in ethics, psychopathology, assessment and interventions exposing students to more than one theoretical orientation and skills needed to work with both adults and children and diverse populations. Students carry out at least 2,700 hours of clinical training under supervision (at least 300 direct client hours; at least 150 hours of supervision prior to the predoctoral residency), including a four month internship, two PhD clinical placements and a predoctoral residency. Students also complete an oral case presentation, an oral ethics exam and an exam covering broad topics in clinical psychology.

Knowledge Goals: Students will gain a working understanding of biological, social, cognitive and affective bases of behaviour as well as individual differences, statistics and research methods. A more thorough knowledge of personality, psychopathology, assessment, diagnostics, intervention, ethics and professional behaviours will be obtained. Several theoretical orientations are covered.

Knowledge Objectives: To gain the above knowledge students complete course work at the graduate level in the above areas. Further knowledge is gained through clinical experiences and comprehensive exams.

Ethics and Professional Conduct Goals: The program strives to prepare students to be ethical and professional in their research, clinical, and teaching activities. Moreover, the program strives to prepare students to be sensitive to issues of racial and cultural diversity and individual differences.

Ethical Objectives: To meet the above goals of our program, students take a course in professional ethics that not only thoroughly covers the CPA code of ethics and ethical decision making process, but also legislation, standards of practice, and cultural issues. They are also trained in becoming competent and effective in their interpersonal relationships. Students are exposed to diverse clients (over 2700 hours of clinical training), and diverse faculty mentors. Students also complete an oral ethics exam as part of the comprehensive examination process.

Leadership Goals: We encourage our graduates to: (a) disseminate their work through conference presentations and publishing papers; (b) expand their knowledge by attending conferences or workshops and reading journals; (c) train others in psychology and other mental health fields; (d) educate the public; and (e) contribute to psychology as a discipline by holding leadership roles.

Leadership Objectives: To meet the leadership goals, students are encouraged to present and publish their work, to obtain experience as teaching assistants, to be involved in training junior students and to play an active role in the development of the discipline of psychology by being an active member of the Psychology Graduate Students Association and the Canadian Psychological Association. To encourage professional development, students complete a seminar series devoted to professional issues at the PhD level. A major component of this seminar series is focused on development of skills in supervision and inter-professional relationships.
Evaluation of Outcomes
The program evaluates its outcomes on an annual basis. Our annual program evaluation is available on the departmental website and is included as an Appendix of this brochure.

Academic and Practical Functions for which the Students will be Prepared
Students from our program will be prepared to pursue a variety of careers, including primarily research, clinical, or teaching positions, or a combination of these activities. We recognize and value that students have varying career aspirations. The program strives to prepare students to be well grounded in research, the provision of clinical services, and teaching.

Recent Practica and Four Month Internship Settings
Beyond course work, clinical psychology students have a variety of training opportunities in Regina, other areas of Saskatchewan and elsewhere. Examples of four month internship and practica training sites include:

- Counselling Services, *University of Regina*
- Psychology Training Clinic (Child-Family Clinic & Adult Clinic), *University of Regina*
- Child and Youth Services, *Regina Qu’Appelle Health Region*
- Mental Health Services, *Regina Qu’Appelle Health Region*
- Wascana Rehabilitation Centre (Adult Rehab Program; Functional Rehab Program; Children’s Program; Extended Care/Veterans Program), *Regina Qu’Appelle Health Region*
- Prairie Psychological Services, *Regina, SK*
- Royal Canadian Mounted Police Academy, *Regina, SK*
- Battlefords Mental Health Centre, *North Battleford, SK*
- Saskatchewan Hospital (Inpatient Unit; Forensic Unit), *North Battleford, SK*
- Prince Albert Mental Health Centre, *Prince Albert, SK*
- Yorkton Mental Health Centre, *Yorkton, SK*
- Yorkton Functional Rehabilitation Clinic, *Yorkton, SK*
- Cypress Health Region, *Swift Current, SK*
- Regional Psychiatric Hospital, *Saskatoon, SK*
- Centre for Addiction and Mental Health, *Toronto*
- St. Joseph’s Hospital, Anxiety Treatment and Research Centre, and Mood Disorder Program, *Hamilton, ON*
- Carnat Centre, Alberta Health Services, *Calgary, AB*
- Alberta Health Services, *Calgary, AB*
- Cross Cancer Institute & Department of Psychology, University of Alberta Hospital, *Edmonton, AB*
- Life Mark Health, *Calgary, AB*
- Mandel and Associates, *Calgary, AB*
- Saanich Child and Youth Mental Health, *Victoria, BC*
- Rogers Memorial Hospital, *Oconomowoc, WI*

These placements offer graduate students clinical experience in assessment, individual therapy, and group therapy. Ph.D. level psychologists supervise from a variety of theoretical perspectives. Individuals who have an interest in seeking placements in other provinces can explore this option with the Clinical Placement Coordinator. This has been feasible in several instances in the past. Students who are accepted into our program should be prepared to seek some of their clinical training outside of Regina.
Sun Life Financial Psychology Training Clinic
Many students receive training in the newly renovated Sun Life Financial Psychology Training Clinic with supervision provided by registered doctoral clinical psychologists. Clients or community providers can refer to the clinic. Students are involved in the assessment and treatment of clients under supervision. Clients present with a variety of mental health conditions and gain experience in diagnostic assessment of mental health conditions. Individual, group and family therapy is used. Students working in the clinic can book a clinic computer and desk to complete reports, and book a group room (2), individual assessment/therapy room (4 rooms) or family room (2 rooms) to see clients. All therapy rooms can be viewed by a one-way mirror and both audio and video recording are available.

Predoctoral Residency
As part of training, doctoral students must complete a 1-year predoctoral residency at a CPA accredited site or equivalent. Our students have had a high degree of success in obtaining residences to their liking. Predoctoral residences are normally completed outside Regina. Sites since 2001 include:

- Annapolis Valley Health - Valley Regional Hospital, Kentville, NS (2 students)
- British Columbia Mental Health and Addiction Services, Vancouver, BC
- Calgary Consortium in Clinical Psychology, Calgary, AB (5 students)
- Central California Psychology Internship Consortium (CCPIC), California (2 students)
- Centre of Addictions and Mental Health, Toronto, ON (3 students)
- Clinical Health Psychology, University of Manitoba, Winnipeg, MB (3 students)
- Edmonton Consortium Clinical Psychology Residency, Edmonton, AB
- Hospital for Sick Children, Toronto, ON
- London Clinical Psychology Consortium, London, ON (2 students)
- Millard Health Centre, Edmonton, AB
- Northern Ontario Psychological Consortium, Thunder Bay, ON
- Ongwanada: Kingston Internship Consortium
- Ottawa Hospital, Ottawa, ON (2 students)
- Queen Elizabeth II Health Science Centre, Halifax, N.S. (4 students)
- Regina Qu’Appelle Health Region, Regina, SK (10 students)
- River Valley Health, Fredericton, N.B.
- Royal Ottawa Health Care Group, Ottawa, ON (5 students)
- Saskatoon Health Region, Saskatoon, SK (6 students)
- St. Joseph’s Hospital, Hamilton, ON
- University of Arizona, College of Medicine
- University of British Columbia, Counselling Services
- University of Washington School of Medicine, Seattle, WA
- Vancouver Coastal Health, Vancouver, BC (3 students)
Clinical Program Facts

- We received 36 applications to our MA Program for September 2016 admission.
- Each year, we extend approximately seven to nine offers to MA applicants and enrol five to seven new students.
- The majority of students accepted into our PhD program have completed their MA program at the University of Regina. However, we do consider applicants from other MA programs. This year we accepted a student from outside of our program.
- Students who were admitted in the last three years had an average grade of approximately 87%. Average graduate record examination (GRE) percentile scores were as follows: Verbal 79%, Quantitative 55%, Analytical 80%.
- Attrition rates (i.e., leaving the department before the completion of a degree) are approximately 3% for the M.A. program and 3% for the PhD program in the last 14 years.
- The student body currently is comprised of 36 MA and PhD students, with 31 female and 5 male students.
- 9 of these students are from Saskatchewan, 26 are from other Canadian provinces, and 1 is an international student.
- The average age of our graduate students is 25 and ranges from 23-39.
- There are 2 students who are represent visible minority groups.

At present, we have no students with special needs enrolled in our graduate programs; however, we encourage applications from qualified persons with special needs. All university buildings are wheelchair accessible and specific assistance and equipment for students can be arranged through the Centre for Student Accessibility (306-585-4631).

Our Graduates

Graduates from our program have been highly successful in obtaining employment in clinical settings (e.g., hospitals, mental health clinics) and research settings (e.g., universities). All of our doctoral clinical program graduates have been successful in becoming registered, licensed or certified (or, in the case of very recent graduates, are in the process of becoming registered, licensed or certified) as psychologists in the jurisdiction of their choice.

Clinical Degree Programs

The degree programs in Clinical Psychology offered in the Department are based on a scientist-practitioner model of training and emphasize clinical, research, and professional skill development.

The M.A. program in Clinical Psychology is intended to provide students with a solid grasp of basic academic and practical skills. The Ph.D. program in Clinical Psychology builds upon the M.A. program and provides an opportunity for advanced research, study, and clinical skills acquisition. In line with the current emphasis of many programs and jurisdictions in North America with respect to academic training and credentialing in Psychology, students pursuing graduate education and training in Clinical Psychology are strongly encouraged to do so at the doctoral level. As such, all students completing the M.A. are expected to apply to the Ph.D. program. Students who are enrolled in our clinical program are expected to maintain full-time student status.
M.A.
Psyc 801 Research Design and Methodology in Psychology (3 credit hours)
Psyc 802 Applied Multivariate Statistics (3 credit hours)
Psyc 806 Ethics and Standards of Professional Practice (3 credit hours)
Psyc 832 Advanced Psychopathology (3 credit hours)
Psyc 850 Psychological Assessment I (3 credit hours)
Psyc 860 Psychological Interventions I (3 credit hours)
Psyc 876 Internship in Clinical Psychology (1 credit hour)
Psyc 900 Graduate Seminar (2 credit hours)
Psyc 901 Thesis Research (16 credit hours)

Total Credit Hours: 37 credit hours

All course work is taken in the first academic year. The second academic year is used to complete research and usually the four month internship. Students in this program will normally apply for admission to the Ph.D. program in Clinical Psychology in January of their second year in the program. At this time of application to the Ph.D., all required course work and the clinical internship should be complete and data collection for the MA well underway. The likelihood of being accepted into the Ph.D program decreases if students do not meet these timelines.

Ph.D.
Psyc 800 History, Theory and System in Psychology (3 credit hours)
(or equivalent, e.g., Psyc 824, 826)
Psyc 803 Psychometrics (3 credit hours)
Psyc 851 Psychological Assessment II (3 credit hours)
Psyc 861 Psychological Interventions II (3 credit hours)
One elective Psychology course (3 credit hours)
Psyc 865 Comprehensive Exams (1 credit hour)
Psyc 870 Practica in Clinical Psychology (1 credit hour)
Psyc 871 Practica in Clinical Psychology (1 credit hour)
Psyc 880AB Residency in Clinical Psychology (3 credit hours)
Psyc 900 Doctoral Seminar (1 credit hour)
Psyc 901 Thesis Research (44 credit hours)

Total Credit Hours: 66 credit hours

Ph.D. courses are typically offered every 2nd year. In addition to the above, students must demonstrate competence in: (a) biological bases of behaviour (e.g., physiological, comparative, neuropsychology, psychopharmacology); (b) cognitive and affective bases of behaviour (e.g., learning, sensation, perception, cognition, motivation, emotion); and (c) social bases of behaviour (e.g., social, cultural, ethnic, and group processes, sex roles, theories relating to organisations and systems). This can be accomplished either by taking a graduate course in each of these areas (one of which could be used to fulfil the Ph.D. elective course requirement), or by completing all-inclusive qualifying examinations (for students who demonstrate significant prior experience in an area, qualified faculty will co-ordinate the relevant reading lists and exam). A combination of graduate courses and examinations may also be used to fulfil the requirements. Moreover, students can demonstrate competence (subject to approval by the clinical committee) in a maximum of one cognate area (i.e., biological, cognitive or social) if they have completed a minimum of two advanced undergraduate courses in any one of the three cognate areas. Courses in these cognate areas may be taken at any point during the student’s graduate training with departmental approval. In addition, students are encouraged to take courses in other areas such as program development/evaluation.
The program requires two years of full-time residency for the M.A. and four years full-time for the Ph.D. At least three years of the Ph.D. training are spent on campus and one year is spent on the predoctoral residency.

**Clinical Training**
Students in the graduate program in Clinical Psychology complete a minimum of 900 hours of supervised practical experience consisting of a 600 hour four month internship in Clinical Psychology (Psyc 876) and a minimum of two additional 150 hour Practica in Clinical Psychology (Psyc 870-875) prior to the full-year Pre-doctoral Residency in Clinical Psychology (Psyc 880AB). No more than 600 hours of the required supervised clinical experience can be undertaken for academic credit by students enrolled in the M.A. program in Clinical Psychology. For the full-year pre-doctoral residency, students are expected to apply to CPA accredited sites or equivalent and to go through the Association of Psychology Postdoctoral and Internship Centers (APPIC) matching process ([www.appic.org](http://www.appic.org)). Students will receive at least 300 hours of direct contact with clients prior to the pre-doctoral residency and at least 150 hours of supervision.

**Comprehensive Examination**
The Ph.D. Comprehensive Examination (Psyc 865-CL) covers broad aspects of clinical psychology, and consists of four parts:

1) A case presentation (~2 hours in length for presentation and questions) in which students are required to summarize a case that they have assessed and treated during a previously completed practicum or internship. In the presentation, the student must cover and integrate theory, research, assessment, and intervention in relation to the clinical case.

2) A written exam testing students on recent literature published in the Annals of Clinical Psychology

3) An ethics oral examination (~1 hour in length) during which students are asked questions that are designed to assess their understanding of ethical and professional issues and their ability to resolve ethical dilemmas.

4) A program evaluation proposal. The following students are exempt from this component: a) Students who successfully completed a graduate course in program evaluation; b) students who participated in the Canadian Evaluation Society Annual Case Competition; and c) students who completed substantial supervised work (as determined by the clinical committee) in the area of program evaluation including a written program evaluation report.

The comprehensive examination process is typically completed over a four-month time span and is used as a means of judging whether or not the student has a mature and substantial grasp of the discipline and the ability to integrate theory, research, and practice in the areas of psychopathology, assessment, treatment, and ethics.

This examination is scheduled after the student has completed all degree requirements, with the exception of the doctoral dissertation and pre-doctoral residency. It must be taken prior to applying for the pre-doctoral residency.

All parts must be passed in order to meet the comprehensive examination requirement. Unsuccessful candidates for the comprehensive examination may repeat each component of the examination once. A second failure will result in the student being discontinued from the Clinical Program.
Program Manual
More details on the Clinical Psychology Program can be obtained by downloading the Clinical Psychology Program Manual (http://www.uregina.ca/arts/psychology).
Experimental and Applied Psychology (EAP) Degree Program

Overview
The Experimental and Applied Psychology (EAP) program is designed to prepare students for careers in either academic settings or as researchers in industry or the public sector. Recent graduates of the doctoral program have accepted faculty appointments in Canada and abroad, and research positions with the Saskatchewan government, RCMP, and the Regina Qu’Appelle Health Region.

Orientation
The EAP program focuses on training students to become independent researchers who are capable of carrying out high quality, high impact research. Faculty in the EAP program have research interests that address both basic questions of global importance and applied problems that impact our community, our province, and our country. To this end, student training takes place in traditional laboratory settings as well as in non-academic community settings, such as in hospitals, schools, and law enforcement agencies. A key component of the EAP program is strong mentorship, with students working closely with their supervisors at every stage of the development and implementation of research projects. Students also have opportunities to work with researchers in areas outside of their immediate area of specialization, and collaboration is encouraged. As part of their training, students are encouraged to present their findings at research conferences both at the University of Regina and around the globe. To this end, the Faculty of Graduate Studies provides travel awards on a competitive basis, in three competitions each year.

Research Areas
Our faculty carry out high quality research in a wide variety of areas, published in high-calibre, peer-reviewed journals. Students interested in applying to our program are encouraged to consult the list of active research topics below when preparing their applicant’s statement.

Faculty research in cognitive psychology focuses on questions of interest in both basic areas (including attention and perception, memory, learning, mathematical cognition, and decision making) and applied areas (such as goal pursuit, with application to pro-environmental and conservation behaviour; face recognition, with application to policing and security; investigative interviewing, with application to the law; risk-taking behaviour, with application to gambling and criminal behaviour).

Our faculty specialized in developmental psychology conduct research on how children learn and become skilled in academic domains such as arithmetic, the development of action perception and understanding of action goals, how social cognition develops in infancy and early childhood, and developmental differences in children’s memory.

Faculty research interests in forensic psychology include the psychology of policing, reliability of eyewitness testimony, assessment of instruments used in forensic settings, predictors of criminal behaviour with emphasis on the role of risk-taking, and factors affecting decisions made by law enforcement officials in the field.

Our research in neuroscience explores the neural correlates of the expression and interpretation of emotion; sex differences in cognitive and visuomotor skills, and the effects of differential prenatal exposure to hormones on behaviour later in life.

Faculty in social psychology carry out research that examines social determinants of risk-taking; decision-making in police investigators, judges, and jurors; perceptions of credibility; and, ethical practices such as debriefing in social psychology research.
Program Structure

Students in the EAP program complete courses in research methods, statistics, ethics, and courses in their chosen area of specialization, as well as courses in other areas of interest to the student. Both M.A. and Ph.D. candidates complete thesis research, developed in consultation with the student’s supervisor and a thesis committee. Following acceptance of a thesis by the student’s thesis committee, an oral examination (defense) will be held. Doctoral candidates are also required to complete a comprehensive examination. The format of the comprehensive examination is flexible, with students able to choose from among several options including writing a mock research grant proposal, completing a research practicum with a community partner, or developing a new course, as best meets the career objectives of the student. M.A. students typically complete their program of study in two years; Ph.D. students typically complete their program of study in three years.

The courses required for the M.A. and Ph.D. degrees are as follows.

M.A.
PSYC 801 Research Design and Methodology in Psychology (3 credit hours)
PSYC 807 Research and Applied Ethics (3 credit hours)
PSYC 802 Applied Multivariate Statistics
or PSYC 805 Experimental Design and Analysis of Variance (3 credit hours)
One additional PSYC course (3 credit hours)
PSYC 900 Graduate Seminar in Psychology (2 credit hours)
PSYC 901 Thesis Research (16 credit hours)
Total: 30 credit hours

Ph.D.
PSYC 800 History, Theory and System in Psychology (3 credit hours)
Three additional PSYC courses (9 credit hours)
PSYC 901 Thesis Research (48 credit hours)
PSYC 865-EA Comprehensive Examination (1 credit hour)
Total: 61 credit hours

Faculty Research Interests, Primary Departmental Area Affiliation and Selected Publications

Clinical Psychology Area Faculty
Gordon J. Asmundson, Ph.D., FRSC (Manitoba), Professor
Research and clinical interests involve understanding the basic mechanisms of the anxiety disorders, health anxiety, acute and chronic pain, and the association of these with disability and behavior change as well as related assessment and treatment issues.
Email: Gordon.Asmundson@uregina.ca

Shadi Beshai, Ph.D, Assistant Professor
Current research interests include the following: a) major depression (both episodic and recurrent); b) adult Cognitive Behavioural Therapy (CBT) and Mindfulness-Based Interventions (MBIs); and c) moderators (e.g., culture and diversity factors) and mediators (e.g., cognition) of outcome in evidence-based psychotherapy for adults. Clinical interests fall within the areas of adult Cognitive Behavioural Therapy, Mindfulness-Based Interventions, and adult clinical assessment.
Email: Shadi.Beshai@uregina.ca

R. Nicholas Carleton, Ph.D. (Regina), Associate Professor
Research interests include the biopsychosocial measurement, assessment, and treatments of anxiety, traumatic stress, chronic pain, mood, and somatic disorders, focusing on transdiagnostics, fundamental cognitions (i.e., lower-order factors such as intolerance of uncertainty), and shared emergent properties (i.e., higher-order factors such as extraversion). Attentional biases and psychometrics and statistics. Representative Projects include: Researching Intolerance of Uncertainty; Modifying cognitive biases in social anxiety; Modifying cognitive biases in pain; Researching trauma, fear, and anxiety with first responders.
Email: Nick.Carleton@uregina.ca

Jennifer Gordon, Ph.D. (McGill), Assistant Professor
Current research interests involve understanding the biological and psychological mechanisms by which reproductive hormones (e.g. estrogen and progesterone) influence mood and wellbeing across the female lifespan (e.g. adolescence, menopause transition).
Email: Jennifer.Gordon@uregina.ca

Heather Hadjistavropoulos, Ph.D. (British Columbia), Professor
Current research interests include examining: 1) the implementation of therapist-assisted internet-delivered cognitive behaviour therapy among diverse patient groups in different settings (e.g., how to promote, screen for, offer therapist support, train therapists, manage complex patients, predict and improve outcomes) and 2) the etiology, assessment and treatment of psychological problems (e.g., health anxiety) among patients with medical conditions (e.g., chronic pain, multiple sclerosis, diabetes, cancer). Clinical interests focus on the assessment and treatment of adults with anxiety and depression, especially among those with medical conditions.
Email: Heather.Hadjistavropoulos@uregina.ca

Thomas Hadjistavropoulos, Ph.D., ABPP, FCAHS (Saskatchewan) Professor, Research Chair in Aging and Health and Director of Centre on Aging and Health
Current research interests include the following: a) Clinical health psychology b) pain; c) aging; d) fear and anxiety in older persons; and d) ethics and professional issues in clinical psychology. Clinical interests fall within the areas of adult Cognitive Behaviour Therapy and adult clinical assessment.
Email: Thomas.Hadjistavropoulos@uregina.ca

Mary Hampton, Ed.D. (Harvard), Professor (Luther College, University of Regina)
Counselling & consulting Psychology. Special interests in women’s studies, community Psychology, cross-cultural counselling, women's health, and Aboriginal peoples’ health.
Email: Mary.Hampton@uregina.ca

Bridget Klest, Ph.D. (Oregon), Associate Professor
Research interests focus on interrelations among trauma exposure, social context factors (e.g., relational context of trauma, soci-economic status), and well-being. Current projects are focused on the healthcare experiences of trauma survivors, and associations between health experiences, individual differences, and trauma.
Email: Bridget.Klest@uregina.ca

**Lynn Loutzenhiser, Ph.D.** (Saskatchewan), *Associate Professor, Director of Clinical Training*

Research interests include parenting and health, and on-line interventions for parents of anxious children. Clinical interests include the assessment and treatment of childhood disorders, particularly Autism Spectrum Disorders.

Email: Lynn.Loutzenhiser@uregina.ca

**Phil Sevigny, Ph.D.** (Regina), *Assistant Professor* (Luther College, University of Regina)

Counselling & consulting Psychology. His research is on the changing roles of men in families with a focus on the associations between parenting beliefs and positive father involvement. Dr. Sevigny is also continuing his research with Dr. David Malloy exploring cross-cultural variance in understandings of existential courage.

Email: Phillip.Sevigny@uregina.ca

**Jaime Williams, Ph.D.** (Regina), *Assistant Professor*

Academic work includes mixed methods investigations of issues in health and aging, and research- creation of multimedia visual/performance art engaging concepts of gender, identity and performing the self, labour and power relations, and personal and collective autonomy.

Email: willia4j@hotmail.com

**Kristi Wright, Ph.D.** (Dalhousie), **Associate Professor**
Current research interests include: childhood psychopathology; health anxiety, preoperative anxiety, health behaviours.
Email: Kristi.Wright@uregina.ca

**Experimental and Applied Psychology Area Faculty**

Katherine D. Arbuthnott, Ph.D. (Saskatchewan), **Professor (Campion College, University Of Regina)**
Cognitive psychology: Current research focuses on processes that facilitate goal-pursuit and self-control with particular application to pro-environmental behaviour.
Email: Katherine.Arbuthnott@uregina.ca

Jeff Loucks, Ph.D. (Oregon), **Assistant Professor**
Broad research interests include the development of social cognition. More specific current interests include infant, child, and adult action perception, infant social cognition, and the relation between motor experience and action understanding.
Email: Jeff.Loucks@uregina.ca

Richard N. MacLennan, Ph.D. (Western), *Professor, Department Head*
Richard N. MacLennan, Ph.D. (Western) Professor, Department Head
Psychological measurement and statistics. Also interested in the application of psychological testing to practical problems in industrial-organizational, police, and military psychology.
Email: Richard.Maclennan@uregina.ca

Chris Oriet, Ph.D. (Waterloo), *Professor*
Interests focus primarily on the effects of attention and experience on perception and memory, as well as limitations in the allocation of attention across time and space. Current research interests include: 1) statistical summary representations of sets, 2) the relationship between attention and awareness, 3) attentional biases, and 4) methodological issues in eyewitness memory.
Email: Chris.Oriet@uregina.ca

Tom Phenix, Ph.D. (Saskatchewan), *Associate Professor (Campion College, University Of Regina)*
Mathematical cognition; retrieval-induced forgetting; math anxiety
Email: Tom.Phenix@uregina.ca

Katherine Robinson, Ph.D. (Alberta), Associate Professor (Campion College, University Of Regina)  
**Mathematical Cognition Lab** Research with both adults and children on procedural, factual, and conceptual knowledge of arithmetic. Supported by NSERC discovery grants and internal grants.  
**Child Health and Learning (CHLD) Lab** (with Drs. Kristi Wright & Heather Price) CFI-funded research facility designed specifically for data collection with children.  
**Interactive Media, Poetics, Aesthetics, Cognition, and Technology (IMPACT) Lab** (with Drs. Christian Riegel & Sheila Petty) CFI-funded interdisciplinary research facility designed to conduct studies on how poetics and aesthetics affect cognitive processing and how both of these are mediated by the multimedia platform on which they are presented. Equipment includes eye tracker and several multimedia devices (e.g., virtual reality goggles and iPhones).  
Email: Katherine.Robinson@uregina.ca

Donald A. Sharpe, Ph.D. (Manitoba), Associate Professor  
Current research interests include applications of quantitative approaches (e.g. meta-analysis; structural equation modeling), research methodology and ethics.  
Email: sharped@uregina.ca

William E. Smythe, Ph.D. (Toronto), Professor  
Foundational issues in theoretical psychology; narrative and discursive psychology; psychological hermeneutics; psychology of fiction; foundations and ethics of qualitative research.  
Email: William.Smythe@uregina.ca

**Laurie Sykes Tottenham, Ph.D.** (Saskatchewan), *Associate Professor*
My research examines individual differences in emotional and spatial abilities from a neuropsychological perspective. Areas of focus include: laterality, influences of task characteristics, and steroid hormones. Research techniques include salivary enzyme immunoassays (conducted on-site, to assess circulating hormone concentrations) and behavioural testing.
Email: [Laurie.SykesTottenham@uregina.ca](mailto:Laurie.SykesTottenham@uregina.ca)

**Adjunct Faculty**
Angelina Baydala, Ph.D. (Private Practice, Edmonton)
I research the history of psychotherapies and how social, economic and political forces press schools of psychotherapy into being, promoting a way of life. My research also considers how psychological disorders are caught up with social loyalties, economic dependencies, fear and anger in dynamics with, for example, patriarchal oppression, inherited notions of good and bad, and alienation from nature.
E-mail: [Angelina.Baydala@uregina.ca](mailto:Angelina.Baydala@uregina.ca)

**Regan Hart, Ph.D.** (Saskatoon)
Derrick D. Larsen, Ph.D. (Regina Qu’Appelle Health Region)

Heather Price, Ph.D. (Simon Fraser), Associate Professor
Current research interests include: Children as witnesses; autobiographical and event memory; alibi witnesses; effects of stress/emotional arousal on memory; forensic interviewing.
Email: Heather.Price@uregina.ca

Michelle C.E. McCarron, Ph.D. (Regina Qu’Appelle Health Region)
Current research interests include: qualitative research methodology, with a focus on conceptual development as a method of data analysis; qualitative health research; research ethics; and professional mentoring.
Email: Michelle.McCarron@uregina.ca or Michelle.McCarron@rqhealth.ca

Katherine Owens, Ph.D. (Regina Mental Health Clinic, Regina Qu’Appelle Health Region; CBI Physical Rehabilitation Centre)

Current interests include: Cognitive Behavioural Therapy, neuropsychological assessment, anxiety disorders, mood disorders, mental health assessment, clinical supervision, clinical training, psychological first aide/post-disaster/conflict zone volunteering, and tertiary-level multidisciplinary rehabilitation

Jennifer St. Onge, Ph.D. (Regina Qu’Appelle Health Region)

Associate Members
Kim Dorsch, Ph.D. (Kinesiology and Health Studies, University of Regina)
Sandeep Mishra, Ph.D. (Business Administration, University of Regina)

Professional Associates
Bruce Gordon, Ph.D. (Child &Youth Services, Regina Qu’Appelle Health Region)
Pamela Clarke, Ph.D. (Prairie Psychology Services)
Tania Safnuk, Ph.D. (Prairie Psychology Services)
Katherine Owens, Ph.D. (Mental Health Services, Regina Qu’Appelle Health Region)
Amy Janzen Claude, Ph.D. (Mental Health Services, Regina Qu’Appelle Health Region)
Heather Switzer, Ph.D. (Children’s Programme, Wascana Rehabilitation Centre)
David West-Johnson, Ph.D. (Functional Rehab Programme, Wascana Rehabilitation Centre)
Jason Peebles, Ph.D. (RCMP Mental Health)
Kent Klippenstine, Ph.D. (Counselling Services, University of Regina)
Wayne Schlapkohl, Ph.D. (Prairie North Health Region, North Battleford, SK)
Dallas Savoie, Ph.D. (Prairie North Health Region, North Battleford, SK)
Lisa Berg-Kolody, Ph.D. (Mental Health Centre, Prince Albert Parkland Health Region)
Margaret Ralston, Ph.D. (Mental Health Centre, Prince Albert Parkland Health Region)

Professors Emeritus
Dennis P. Alfano, Ph.D.
Siu Chow, Ph.D.
Robert Moore, Ph.D.
William Muir, Ph.D.
Joan Roy, Ph.D.
William Wynn, Ph.D.

CLINICAL PSYCHOLOGY PROGRAM
DEPARTMENT OF PSYCHOLOGY
UNIVERSITY OF REGINA

APRIL 2015 TO MAY 2016 PROGRAM REVIEW

LYNN LOUTZENHISER, PH.D., R. D. PSYCH
Director of Clinical Training
Overview of Review

CPA encourages us to evaluate our program on a regular basis. The purpose of this report is to review the goals, objectives and outcomes of the Clinical Psychology Program. Please send comments and feedback to lynn.loutzenhisер@uregina.ca.

Research

Research Goals: We strive to prepare students to have an understanding and respect for both basic and applied research.

We subscribe to the views that the clinical scientist, who is competently trained in practice, makes the most significant contributions to clinical research; and the practitioner, who is familiar with the body of basic and applied research, and, who can critically evaluate research findings makes the soundest contributions to society and the profession.

Research Objectives: To meet the above goals, students: 1) take courses in research methods and statistics and gain experience in program evaluation; 2) take clinical courses that incorporate research literature; 3) complete an M.A. thesis and Ph.D. dissertation; and 4) participate in faculty research projects.

Outcomes: The following are some indicators that represent how we are doing in this area:

<table>
<thead>

** includes both tri-council funding and other major external funding

Clinical Practice

Clinical Practice Goals: Students will be trained to be competent in assessment, diagnosis, and intervention. In each area, students will gain competency in the development and maintenance of interpersonal relationships, including competency in working with diverse groups. It is recognized, however, that the field of clinical psychology is diverse and no single practitioner can master all areas. Students will be taught to recognize their skills and when appropriate refer to colleagues who have the requisite skills.
Clinical Practice Objectives: Students will meet the clinical goals by: 1) completing course work in psychopathology, assessment and interventions exposing students to more than one theoretical orientation and skills for working with both adults and children and diverse populations; 2) carrying out at least 2700 hours of clinical training under supervision; and 3) completing comprehensive exams that require an oral case presentation, a review paper on a clinical topic, and an ethics oral exam.

Outcomes: Some indicators of our success in this area are:

<table>

Knowledge

**Knowledge Goals:** Students will gain a working understanding of biological, social, cognitive and affective bases of behaviour as well as individual differences, statistics and research methods. A more thorough knowledge of personality, psychopathology, assessment, diagnostics, intervention, ethics and professional behaviour will be obtained.

**Knowledge Objectives:** To meet the knowledge goals students: 1) complete course work at the graduate level in all of the above areas, 2) gain knowledge through clinical experiences, and 3) complete comprehensive exams.

**Outcomes:** Indicators of success are reflected in course work completion noted above but also in marks for the following courses:

<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>

Ethics and Professional Conduct

**Ethics and Professional Conduct Goals:** Students will be prepared to be ethical and professional in their research, clinical, and teaching activities, and sensitive to issues of racial and cultural diversity and individual differences.

**Ethics and Professional Conduct Objective:** To meet the ethical goals of our program, students: 1) take a course in professional ethics, 2) are exposed to diverse clients at clinical training sites (over 2700 hours of clinical training), 3) complete an oral ethics exam as part of the comprehensive examination process, and 4) apply for ethics approval for M.A. and Ph.D. research.

**Outcomes:** This is measured through the following:

<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>

Leadership

Leadership Goals: Students will gain experiences that prepare them to take leadership roles and contribute to psychology as a profession.

Leadership Objectives: Students complete a seminar in professional issues at the PhD level and are encouraged to:
1) present and publish their work, 2) attend professional seminars and conferences when possible, 3) gain experience in supervision of junior students, 4) obtain experience as teaching assistants or sessional instructors, 5) be active in the department and the PGSA and the community, and 6) be members of the Canadian Psychological Association or other professional organizations.

Outcomes: Indicators of outcome in this area are seen through examination of students enrolled each year:

Notable strengths and suggestions for improvements: reported by students 2010-2016

STRENGTHS IN THE AREAS OF:
Research
- Research education & training (5)
- Productive research lab (1)

Faculty and Supervisors
- Supportive supervisor/faculty (3)
- Supportive clinical supervisors (1)
- Supportive DCT invested in program and student success (2)
- Expertise and experience of the faculty (2)
- Personable program given small nature of program (3)

Clinical Training
- Diversity of clinical training experiences (adult, child, neuropsychological, clinic based, hospital based) (4)
- Felt prepared for internship & career (1)
- Felt competitive with other students from other programs (1)

Courses/Workshops
- Quality of courses (2)
- Exposed to supervision/consultation/interprofessional collaboration (1)
- Lots of additional training experiences available (e.g., symposium) (1)

General Program
- Good balance of research & clinical training (4)
- Accreditation (1)
- Small and cohesive (1)

SUGGESTIONS FOR IMPROVEMENT:
Courses
- Include actual clients in the intervention II class (2)
- Increase the difficulty of the neuropsychology course (e.g., measures, clinical presentations) (1)
- More information on consultative psychology throughout training (1)
- More emphasis on some other therapy approaches in the intervention II class (e.g., DBT, motivational interviewing, schema therapy) (1)
- There is a very limited focus on children and families and a solid foundation for family therapy would be beneficial (1)
- Separate adult and child classes (1)
- More additional workshops (1)
- Examine case studies (1)
- Greater emphasis and provision of information about employment as psychologists; (1)
- Limited focus on marginalized populations – first nations; people with disabilities (1)
- Providing students with the criteria used to decide course grades would help to give students a better sense of their strengths and weaknesses. Students would ultimately (maybe not
immediately) benefit from a culture in which everyone hears about strengths and weaknesses (in practica and coursework and informally) from an early stage but, to build confidence, this is best done in a collegial atmosphere with an emphasis on positive changes observed. (1)

Clinical Training
- Ensure students get experience with diversity with real clients (1)
- More practica and clients during placement (2)
- Exposure to more complex and challenging cases in the later stages of the training would have aided in the transition to my current areas of practice (1)
- Providing more opportunities to carry long-term clients throughout training would have also been helpful. (1)
- Adapting the training program to changing landscape of healthcare and the role of psychology in healthcare settings (1)
- Difficult to get enough client contact hours for APPIC (1)
- Better preparation for applying for residency (e.g., when speaking with graduates from other programs, they indicated that they have seminars dedicated towards informing students on how to apply, how to interview, how to write a good cover letter) (1)

Research
- Implement strict deadlines for thesis (1)
- Closer tracking of progress on thesis/dissertation and more encouragement on supervisors to maintain schedule (students have limited influence) (1)

Administrative
- More independence from FGSR. Their annual progress reports were repetitive from those completed for our department and I never felt they understood the unique nature of our program to other Ph.D. programs (1)
- Other programs reduce fees once student has completed their comprehensive exams, this would be a nice way to reduce the cost of the program (1)
- Work towards guaranteed funding for incoming students (1)
