2026 Faculty of Engineering and Applied Science Dinner

The Faculty of Engineering and Applied Science at the University of Regina is proud to host our 3rd Annual **Engineering & Applied Science Dinner** on **October 1, 2026**—an evening that brings together students, alumni, faculty, and industry leaders in celebration of innovation, mentorship, and the future of engineering.

We are proud to announce that **Scott Jones**, President of Shared Services Canada, will serve as the keynote speaker for the 2026 Faculty of Engineering and Applied Science Dinner.

A distinguished leader in Canada's public service and technology sectors, Scott has spent more than 25 years advancing cybersecurity, digital transformation, and national technology initiatives. As President of Shared Services Canada, he oversees the Government of Canada's enterprise IT infrastructure and digital services. His career has included senior leadership roles with the Canadian Centre for Cyber Security, Immigration, Refugees and Citizenship Canada, and the Communications Security Establishment.

Most importantly to our Faculty community, Scott is a **proud University of Regina alumnus**, holding both a Bachelor of Applied Science in Electronic Systems Engineering and a Bachelor of Science in Computer Science from the University of Regina. His remarkable career exemplifies the impact U of R graduates can have on Canada's technology and innovation landscape.

We are honoured to welcome Scott back to his alma mater to share insights on leadership, innovation, and the future of technology in Canada.

This year's keynote theme, ***"Engineering the Digital Foundations for the Future"***, reflects the growing need to design and scale secure, reliable digital platforms that power emerging technologies like artificial intelligence, support innovation across sectors, and create new opportunities for engineers, researchers, and industry leaders to shape the future. More than a dinner, this event is a dynamic platform for relationship-building between our students and the industries they aspire to join.

As a sponsor, your support directly offsets the cost of attendance for current engineering students. Sponsors have the option of requesting seating at their table(s) for any number of students who we will try to match based on their discipline and career interests, ensuring relevant and meaningful conversations with your tablemates. With global demand for engineers at an all-time high, this is a unique opportunity to:

- Engage directly with top emerging talent
- Highlight the benefits of working with your company
- Build brand presence among students, alumni, and faculty
- Potentially meet your next co-op student or great hire

Looking ahead to Spring 2027, we also invite you to join us as a sponsor of our annual **Project Day** on Saturday, April 3, 2027. This one-day public event showcases the final-year design projects of approximately 100 graduating engineering students as they present their final-year design projects. Attendees, including professional engineers, industry guests, faculty members and family can explore the industry trade show spaces, project and poster displays to learn more about the students' accomplishments and the students themselves!

Sponsoring both the **Dinner** and **Project Day** ensures your company maintains high visibility year-round while deepening your connection to students, faculty, and research at the University of Regina. This year, Dinner sponsors at the **Visionary and Innovation level** will receive sponsorship benefits at both events and be offered the exclusive opportunity to submit an industry challenge to be considered as a student's capstone project for Project Day—giving you a chance to inspire experiential learning, facilitate industry readiness, mentor and shape project outcomes, and engage directly with students as they solve real-world engineering problems.

- Recognition at both events (verbal, digital, print)
- Year-round brand exposure within the faculty
- Enhanced opportunities for recruitment, speaking, and visibility

We hope you will join us in celebrating and supporting the University of Regina Faculty of Engineering and Applied Science. Your participation helps strengthen student opportunities, foster industry connections and engagement, and inspire the next generation of engineers.

A sponsorship package is attached for your consideration, and I would be pleased to discuss how we can create a partnership that meets your objectives.

Thank you for supporting the University of Regina and investing in the future of engineering and the students who will help shape it.

Warm regards,

Sandra King Hendricks
