

April 2026

Important Dates in April

April 3 – Good Friday. University is closed.

April 11 – Capstone Project Day

April 13 – Last day of classes for Winter 2026

April 16 – 29 – Final Exam period

Engineering Students graduating June 16, 2026

Spring Convocation

Clearing outstanding accounts – Financial holds

Ensure the outstanding balance on your account is cleared. You will be allowed to graduate and attend the Convocation ceremony, but you will not receive your parchment, transcripts, or other proof of graduation until the account is cleared. Clear outstanding accounts at least 5 business days before Convocation so that you may receive your parchment at the ceremony.

To make payments contact Financial Services at 306-585-4123. Once your account is cleared, contact ur.graduation@uregina.ca.

Information for APEGS Registration:

APEGS Registration requires a UR transcript that shows a date when your credential (undergraduate degree) was awarded. Do not order your transcript for APEGS until your graduation date appears on your transcript. (See graduation approval process below). The faculty does not send letters to APEGS on your behalf.

Check their website for details: [APEGS Registration](#)

Graduation approval process:

Step 1 - After final grades are in the system, your faculty reviews and approves applicants for graduation (May 8-15).

Step 2 – Faculty of Engineering submits your name to the University of Regina Executive Council for formal approval. Executive Council meeting is May 27, 2026.

Step 3 – After Executive of Council's Formal approval, the Chancellor confers your credential by signing the list of graduands. Your degree appears on your official transcript within a few days.

Step 4 - Letter of Congratulations from Faculty of Engineering are sent to students after Executive of Council meets.

Graduation Photos

If you will be graduating in June 2026 and plan to take a graduation photo, please contact [Camera One](#) to book an appointment.

If you are unable to come to Regina for a portrait session but still want to be on the Class Composite, please contact Camera One to discuss your options.

Camera One is the designated photographer of the Faculty of Engineering and Applied Science and prepares the Class Composite. Academic regalia is provided by Camera One.

Capstone Project Day

Saturday, April 11, 2026, from 9:00am-2:00pm

BOOK YOUR CALENDAR AND PLAN TO BE THERE!

Project Day is a 4th year conference style event where students showcase their capstone projects. It is held in person on the 1st floor of the Education building and includes a poster display and three tradeshow rooms. The conference program and schedule will be available on the website later this month. Attend presentations, talk to the students about their designs and see what is in store for you in your 4th year!

Capstone Students – Safety Reminders

The end is near! You should all be incredibly proud of making it this far. We are excited for Project Day and can't wait to hear all about your amazing projects. A few reminders and updates:

- If you have any last-minute safety issues or concerns about your projects or trade show setup, please contact Lauren as soon as possible at Engg.Safety@uregina.ca.
- Most of you have already renewed WHMIS as required – thank you – but if you have not, please do this on UR Courses before the end of the semester.
- Many of you have expressed interest in being evaluated for the faculty's Safe Design Award – we have received your emails, don't worry! All who expressed interest will have someone from the Local Safety Committee in attendance for your presentation, and your posters (and trade show if applicable) will be evaluated as well. Best of luck to all of you!
- At this stage, many of you are thinking about upcoming job searches, and want to add additional skills or training to your resumé. If you are interested in additional safety training (UofR

or external) or need safety advice about potential employment, you can contact Lauren at Engg.Safety@uregina.ca.

ISE and ERSE non-coop students

If you are currently in Term 4, then you MUST take Term 6 classes in the Spring/Summer 2026. ENIN 253 and 350 are important pre-req for most Winter 2027 classes.

DECLARE YOUR MAJOR

If you are planning on taking classes in the Spring/Summer to complete your Term 1 and Term 2 requirements, please declare your major once you have registered in those classes. We will accept your Major Declaration Form. Do not wait for your grades to come in from Spring/Summer classes. Thanks!

WHMIS Reminder for 1st Year Students

The “Undergrad Mandatory WHMIS” course is required for all beginning undergraduate Engineering students (including re-admissions and transfers). It’s a crucial part of our Engineering accreditation (considered the absolute bare minimum for safety training) and your own professional development – but most importantly, it will help ensure your safety in future engineering courses. Our WHMIS course is also required for access to the Student Shop.

To ensure WHMIS is completed, we recently put a registration hold on your account. If you haven’t already done so, you’ll need to complete our WHMIS course before registering for your next semester(s). Please don’t wait until it’s too late!

What is required of you?

- Complete Undergrad Mandatory WHMIS on UR Courses (passing grade 80% - 3 attempts are permitted). Do this well in advance of your next registration time ticket!
- Download your certificate. As soon as you download, we’ll automatically receive notification. We will then remove the registration hold within 2 business days. If you don’t download, we won’t know that you have finished.

Note we require completion of Engineering’s WHMIS certificate – we cannot accept certificates from other faculties or employers.

If you need to register for other safety courses or have questions about the content, feel free to contact Lauren at Engg.Safety@uregina.ca. As always, reach out any time if you have questions or concerns related to health, safety and wellness.

RCAF Foundation Scholarship

Check it out!
