YOU INSPIRE ME TO...
Through the support of our donors, alumni, and friends, the University raised $6,144,437 during the 2017-2018 fiscal year.

This marks a milestone year for the University and our donor family, as we celebrate the completion of Phase 1 of the College Avenue Campus Renewal Project. Undertaking a capital campaign of such magnitude is of course bound to be a long journey, but it will always be remembered as a worthwhile one with the future of the University and our students as its core purpose — and it could not have been done without the support of people like you.

With the help of many individuals and organizations, the historic College Avenue Campus will continue to serve as an economic, educational, and cultural hub in Regina for the next century. Perhaps just as importantly, it will also stand as a proud symbol of the transformational impact your donor support can, and does, have on our community.

As you read through this Donor Impact Report, I encourage you to reflect on one overarching theme which runs throughout and resonates deeply with us: You inspire me to…

You inspire all of us at the University of Regina to continue growing a culture of giving, and to look to the future with even greater optimism. Some of you have made a legacy gift to the University; some have made the commitment to give to us every month; some have given $1,000+ or made a memorial gift in the last fiscal year; and others have given to us in multiple consecutive years — numbering over an astounding 30 years in some instances.

You will find the names of those donors proudly listed in this report.

To those who have given more than $5,000 cumulatively to the University, we also demonstrate our gratitude by showcasing your names on our donor recognition wall on campus, permanently preserving our rich heritage of philanthropy which the University has long appreciated and celebrated.

This report is also about celebrating the stories behind our students and donors. Although every story is inherently different, the pivotal role each donor plays is always the same — you inspire students to succeed, to chase after their dreams, and to pay forward the same kindness that you have shown them.

If I were to encapsulate in a single word what each of you inspire us in the community to do, it would be this… you inspire us to give.

Thank you for giving us your support, and for inspiring us to support our students in every way we can to help them achieve their dreams.

Sincerely,

Dr. Vianne Timmons
President and Vice-Chancellor
The 2014 Governor General's Caring Canadian Award recipient continued her active volunteerism throughout her undergraduate studies at the University of Regina, serving as the President’s Ambassador, participating in and organizing make-a-thons and fundraisers, and sitting on the Sustainability and Community Engagement Fund Steering Committee to list but a few examples. In celebration of random Acts of Kindness Day several years ago, Olivia also initiated the “Our School Sparkles Because Of You” campaign while working for the University’s Student Success Centre. The campaign went to great lengths to thank the University of Regina custodians in appreciation for all their hard work and dedication.

The custodians gratefully returned the gesture with a gift – a framed box, bearing all their signatures, which to this day is still displayed on the wall at the Student Success Centre.

“The University has done so much for me, and it’s helped me feel like I’m part of a community,” says Olivia. “That’s why it’s important to me that I give back however I can.”

As a student of the Paul J. Hill School of Business, Olivia took on the challenge of representing the University in business school competitions earlier this year, taking home first place at the Inter-Collegiate Business Competition in Kingston, Ontario in the accounting category. For all her academic achievements and volunteer leadership, Olivia says she would be facing a much different scenario had it not been for the student awards she received. The awards included the University of Regina Retirees Legacy Scholarship, the Paul and Carol Hill Scholarship in Business Ethics, the Centennial Merit Scholarship, and the Faculty of Business Administration Excellence Program Entrance Scholarship, among others.

“I’ll always be grateful to the generous donors who made it possible for me to succeed in University, to not have to worry about tuition, and to be in a position where I could give back to the community,” says Olivia, who convocated in the spring of 2018. “There’s not enough money in the world to repay them for the life-changing difference they’ve made for me, but I at least want to say ‘thank you’ to each and every one of them.”

Olivia currently works as Relationship Manager for the Innovation Credit Union based out of Swift Current, where she comes out on her mission to help farmers and small business owners in southwestern Saskatchewan thrive.

One of her aspirations is to someday earn a seat on the Innovation Credit Union’s executive leadership team.

“...one day I hope to become a donor like you, so that I can help students the way you helped me.”

Expecting to defend his doctoral thesis this year, Cong goes on to say, “I want to sincerely thank my many donors who supported me. Giving to scholarships is a long-term investment in students’ futures. As for me, I see myself being a professor and inspiring the next generation of students.”

Cong’s aspirations, however, do not end at research or lecturing, but rather they extend to include giving back in another meaningful way. “I could send only one message to my donors, it would be this...one day I hope to become a donor like you,” Cong promises, “so that I can help students the way you helped me.”

That is the spring Cong hopes to give back in return for the many “drops of water” given to him. We may still not have a clear picture of what data mining is, or what it entails, but what is clearer is that we know Cong’s research is going to be a difference maker; and one cornerstone that will make this possible is the generous support of the people he affectionately calls “my donors”.

“...I needed them, I was able to devote more time to my research, which I hope will in turn help others. His vision is to provide family and emergency physicians with better tools to search for information more efficiently, meaning that those healthcare professionals will be better equipped to determine the most optimal treatments for their patients. How ever, Cong needed a helping hand along the way. "One source of financial support so vital to me has been awards," says the doctoral candidate Cong Gao it is the heart and soul of his life’s work. The Master’s gradu ate of Soochow University had worked five years prior as a programmer, project manager, and systems analyst, and one year as a public-school teacher, in his home country of China before venturing to Canada. The choice to leave China and take his doctorate at the University of Regina was spurred by Cong’s ambition to work with one of the world’s leading data analyzing researchers in his area of interest, Dr. Yiyu Yao, a Professor in the Department of Computer Science.

Currently, under the supervision of Dr. Yao, Cong is using his research into impact. “The University’s motto, ‘As one who serves’, aligns with my own. His vision is to provide family and emergency physicians with better tools to search for information more efficiently, meaning that those healthcare professionals will be better equipped to determine the most optimal treatments for their patients. However, Cong needed a helping hand along the way. "One source of financial support so vital to me has been awards," says the doctoral candidate Cong Gao it is the heart and soul of his life’s work. When University of Regina alumnus and long-time donor Chris Pasterfield is asked at an event to share his and his wife Karen’s story, he gives pause. “Are you sure?” he replies with a humble grin. “Our story isn’t that interesting,” Karen insists, sporting an old University of Regina Cougars Hockey jersey he had given her as a gift. “As a beloved champion and a dear friend, Sandra deserves a legacy in her name,” says Karen. “I once dreamed of becoming a teacher, but I simply didn’t have enough money to pursue it, so Chris and I wanted to give students the opportunity I didn’t have. Hopefully, this will inspire them to one day give back in some way as well.”

Continuing their support of the University for many years, the now retired couple discovered another valuable, forward-thinking way to contribute, and one which will last beyond their lifetime – legacy giving. “I keep telling people to leave a planned gift in their will,” Chris contends. “There’s a ‘feel-good’ aspect, knowing you’re thinking about the next generations.”

“It’s an easy and efficient way to make a lasting gift, supporting the cause closest to your heart,” Karen adds. For the Pasterfields, one cause they have chosen to support through their estate plans is the University’s hockey sports program, hence the Cougars Hockey jersey proudly donned by Chris.

“Watching your favourite university team compete and achieve success instills a profound sense of pride in you,” says Chris. “So far, the University respectfully disagrees. In fact, we would go as far as to say it is an inspiring one to share. To the Pasterfields, as well as to all our other valued planned gift donors, we would like to express our most heartfelt gratitude for your investment in the future of the students we serve. We want all our donors to know they, too, all have inspiring stories – stories which deserve to be told, and heard.”

What is in a name? There are many awards available to hardworking University of Regina students. Some of those awards are placed in endowments, which are invested over time to provide a stable source of support through earned interest.

Take for example the “The Mary Denise Jackson Memorial Award”. We know this endowed award is a critical resource of financial assistance for students pursuing a degree in the Faculty of Engineering and Applied Science, but what about the person who established the award, and the person in whose memory – and name – the award was created?

The day after receiving his Bachelor of Civil Engineering degree at the University of Saskatchewan, Dr. Murray Jackson married his bride Mary Dopko on May 11, 1957 in Saskatoon.

The newlyweds thereafter settled in Regina, where Murray took on the role of bridge engineer in charge of the province’s municipal bridge construction and maintenance.

Mary, who later added “Denise” as her middle name – the name by which Murray from that point onward would call her – worked as a secretary.

Despite securing such a well-paying and highly respected position, Murray found himself confronted with the difficult realization that his passion was not, in fact, engineering, but rather psychology.

At a crossroads, Murray turned to Denise for guidance. Her response was short and resolute: “If you want to do it, we’ll do it.”

Murray sought a new direction, and decided to pursue his bachelor’s and master’s degrees in Psychology at the University of Regina, before going on to take his doctorate degree at the University of London, UK. In 1978, the couple finally relocated to Vancouver, BC where Murray spent two years with a major consulting firm, prior to setting up a private practice as a consulting psychologist, entering into retirement in 1994.

The prominence of some buildings transcends the bricks, mortar and stone of which they are made, and their foundations are stronger than the steel and concrete supporting them. Some hold a century-long history, a storied heritage, a cultural and educational significance, and a host of collective memories across multiple generations. Those are the buildings worth saving, and the University of Regina’s College Avenue Campus is no exception.
Not long after taking up her appointment as President of the University of Regina in 2008, Dr. Vianne Timmons was approached by many alumni, colleagues, students and other members of the community, urging her to save the deteriorating Collegiate Gothic-style campus. Among that committed group were University of Regina alumnus Margaret Anne Hodges, P.Eng., and her mother, Dr. Alice Goodfellow.

The Goodfellow-Hodges family’s connection with the College Avenue Campus, spanning all of four generations, began with Margaret Anne’s grandparents Sampson and Nancy Goodfellow. At one time Sampson had hoped to pursue an education in Engineering, but WWI had other plans for the Scotland native, which included him serving in the Canadian Army and the Royal Flying Corps. Following the war, and his release from a prisoner-of-war camp, he returned to Regina with his England-born bride, Ann Owen (Nancy) Ridgeway. Though not a student of music himself, Sampson was a committed patron of the arts throughout his life. As such, the owner of Western Machine and Engineering encouraged Nancy to continue her passion for music and take both voice and piano lessons at the Conservatory of Performing Arts (formerly known as the Conservatory of Music) at the then-called Regina College.

This training helped lead Nancy to become an acclaimed recitalist, and a member of the first formation of the Elizabethan Singers, playing Darke Hall in many concerts and entertaining crowds as a vocalist. Sampson was likewise actively engaged in the arts community as a volunteer for the Regina Little Theatre and the Regina Symphony Orchestra, when he was not running his business.

Sampson and Nancy’s love for the arts was inevitably passed down to their daughter, Alice Mary, who also studied piano and completed her Associate, Toronto Conservatory of Music (ATCM) diploma. Again figuring significantly in the story, Darke Hall hosted extensive piano and organ performances by young Alice, before she left Regina to undertake her medical degree at the University of Toronto. Dr. Goodfellow specialized in pediatrics and spent the majority of her career helping children, be it through conducting research at various hospital institutions or practicing pediatrics.

Dr. Goodfellow married William Hodges, P.Eng., in 1963, and the family’s proud tradition of performing in that concert venue was further continued by their daughter Margaret Anne Hodges, who has on numerous occasions taken the same stage as both her mother and grandmother had, only this time charming audiences as a theatrical artist. As if that were not enough, Darke Hall even played catalyst to Margaret Anne meeting her future husband, award-winning author Edward Willett.

The most recent generation member of the Goodfellow-Hodges clan to share the honour of gracing Darke Hall as a performer is the couple’s teenaged daughter, Alice Willett. On that very same stage, she has displayed her diverse artistic talents, encompassing dance, singing and acting.

The University of Regina is proud to be part of the Goodfellow-Hodges’ story, which is as much about their multi-generational support of the College Avenue Campus as it is their love for it. Giving where his passion was, Sampson financed and established several memorial awards in support of University of Regina students in the Conservatory of Music. These awards included the Ann Owen Goodfellow Memorial Scholarship, named in memory of his wife; the Dr. Alice Goodfellow Scholarship, for his daughter; the Madam Alicia Birkett Memorial Scholarship, for one of his wife’s voice teachers at the Conservatory of Music; and others. In recognition of his service to the University of Regina, community and province, Sampson received an honourary degree (Doctorate of Law), the highest honour the University of Regina can confer upon an individual. He passed away in 1979.

The family’s philanthropic torch was then passed down to his daughter, Dr. Goodfellow. The long-time member of the College Avenue Campus’s Lifelong Learning Centre continued to support many endowed awards in perpetuity for Conservatory of Performing Arts students. After Dr. Goodfellow’s passing in 2013, her daughter Margaret Anne carried on her family’s legacy of giving by making a generous donation toward the College Avenue Campus Renewal Project and naming a room in honour of her mother.

“The inspiration to dedicate the Movement Studio in memory of my mom came from her long-standing support of the University, built on the foundation of my grandfather’s commitment to help young people pursue a higher education – an opportunity he unfortunately didn’t have,” says the SaskTel engineer of more than 30 years. “It’s important to recognize and remember the builders of our community. It’s not just about the building itself – it’s about people. The people who made it possible, and the people who will enjoy it for generations to come. The heritage of the College Avenue Campus lives on in them.”

As new generations of students follow their passions at the College Avenue Campus, they will be reminded of who those “builders of our community” were – like the Goodfellow-Hodges family – whenever they see the future on-site donor wall and room names. It is because of our donors, their vision and their generosity that we raised almost $9 million to save, and revitalize, the College Avenue Campus.

The University of Regina is also grateful to Conexus Credit Union, a key partner donating up to $8.25 million to the campaign, the Government of Canada, which contributed $28 million, and the City of Regina for its donation of 2.6 acres of land. Our donor community is what fuels optimism in us as we forge ahead and continue our efforts to raise funds for the next phase of the College Avenue Campus Renewal Project – saving Darke Hall. With their support, we are confident that we will succeed in again raising the curtain of this historic concert hall.
When our donors give to the University of Regina, their gifts show us what areas are most meaningful to them.

In the fall of 2017, Saskatchewan-born philanthropists Gordon and Jill Rawlinson showed the community they care strongly about the success of Indigenous people interested in business, donating $100,000 to establish the Rawlinson Executive in Residence Indigenous Entrepreneurship. The role is designed to provide effective and strategic leadership for aspiring Indigenous entrepreneurs.

“I want the University to empower this country’s up-and-coming Indigenous business leaders by giving them a world-class business education right here in my home province,” says Gordon, a member of the Saskatchewan Order of Merit and the Order of Canada, the province’s highest honour and one of Canada’s highest civilian honours respectively.

Patricia Thomson, a member of Carry the Kettle First Nation who holds a masters degree in Business Administration from the University of Regina, sees the gift as an act of compassion which addresses barriers to the victims’ families on social media, and making contributions to the GoFundMe campaign to support the team and families impacted.

Although most of us did not have to witness the immediate aftermath of the event, we also remember those who did – those emotionally affected who will have to live with the traumatic memories for the rest of their lives. Whether serving in the line of duty or as volunteer first responders – the ambulance services providers, firefighters, law-enforcement officers, and other public safety personnel involved – all experienced the unimaginable horror in their rescue efforts.

“The impact of this tragedy is far-reaching,” says Dr. Nicholas Carleton, Professor in the Department of Psychology who is familiar with the real-life stories of the despair and stress experienced by public safety personnel. “Common reactions include distress, sadness, anxiety, and grief, among others, all of which can be normal responses to tragedies. There is also evidence that some may go on to develop symptoms consistent with one or more different mental health disorders or injuries.”

The University would like to extend our deepest thanks and gratitude to Gordon and Jill Rawlinson for their inspiration as much as their continued generosity. No matter their areas of interest, or the faculties for which they feel the deepest affinity, University of Regina donors all share the common passion to help students succeed and become the next generation of leaders, innovators and agents of positive change.
Earning the Reputation as Research Leader

University research is the core element of progress and innovation, and the University of Regina has established itself as a premiere centre of research excellence. The Strategic Research Plan (SRP), which sets the course for research efforts carried out at the University of Regina, is aligned with and linked to our overarching 2015-2020 Strategic Plan, entitled “payak iski likutawaan” – Cree for “Together We Are Stronger”. Identifying research impact as a strategic priority in the SRP, the University is committed to improving the lives of people in Saskatchewan and Canada. A major part of the strength of that research depends on the generous support of donors, who gave more than $1,400,000 to research at the University of Regina in 2017-2018.

It was our track record of research success, coupled with the incredible infrastructure within our Department of Biochemistry, boasting state-of-the-art equipment and world-class facilities, that drew Dr. Mohan Babu away from the University of Toronto to the University of Regina. Passionate about helping people who suffer from mitochondrial diseases (diseases that strike at the cellular level), Associate Professor Dr. Babu has committed his life to understanding the genetic causes of Parkinson's disease. He holds an optimistic outlook on the future of his critical work, acknowledging the importance of donor funding, which propels our University closer to making breakthrough discoveries. “There’s a lot of world-class research taking place right here at the University of Regina,” affirms Dr. Babu. “Federal funding and most importantly donor support help drive this type of cutting-edge research to identify therapeutic targets; allow bench-to-bedside research to translate lab findings into clinical interventions for patients; and increase our understanding of how mitochondrial dysfunction can lead to Parkinson's disease.”

The world-class research Dr. Babu refers to is also making advancements in other areas such as anxiety, stress and pain; digital technology; social justice and community safety; and water, clean energy and environment. As University of Regina faculty researcher, gaining notable recognition for her work, Dr. Maria Isabel Velez is driven by the responsibility to find creative solutions to use the past history of ecosystems to inform aspects related to their conservation and sustainability. As Geology Associate Professor, she embraces yet another responsibility – to train and develop the next crop of scientists. Helping her fulfill both these responsibilities are our donors.

“There’s a lot of world-class research taking place right here at the University of Regina,” affirms Dr. Babu. “Federal funding and most importantly donor support help drive this type of cutting-edge research to identify therapeutic targets; allow bench-to-bedside research to translate lab findings into clinical interventions for patients; and increase our understanding of how mitochondrial dysfunction can lead to Parkinson's disease.”

The world-class research Dr. Babu refers to is also making advancements in other areas such as anxiety, stress and pain; digital technology; social justice and community safety; and water, clean energy and environment. As University of Regina faculty researcher, gaining notable recognition for her work, Dr. Maria Isabel Velez is driven by the responsibility to find creative solutions to use the past history of ecosystems to inform aspects related to their conservation and sustainability. As Geology Associate Professor, she embraces yet another responsibility – to train and develop the next crop of scientists. Helping her fulfill both these responsibilities are our donors.

“Through their support of the Faculty of Science and scholarships, donors are making an investment in the next generation of scientists, helping them to become highly skilled scientists, environmentally conscious leaders, and effective decision makers,” states Dr. Velez.

In addition to Dr. Babu and Dr. Velez, all other researchers at the University of Regina would collectively agree that donor support pushes our research and innovation to new heights, helping us to create a better and healthier future for the broader community and beyond.

Celebrating Philanthropy

Philanthropy can have different meanings to different people. Derived from Greek, the term literally means “the love of people”. We also see it as a term which implies the spirit of giving.

Whether they generously give a share of their time, money, talent or other resources, our donors are philanthropists and demonstrate they care about our students, our University and our future. November 15 marks National Philanthropy Day, a day when we celebrate and recognize the charitable work of philanthropic donors, volunteers, leaders, organizations and others. To honour this grassroots movement, inspire public interest and build awareness of the importance of philanthropy in our community, the Association of Fundraising Professionals (AFP) Regina & Area Chapter organizes an annual luncheon. The association, comprising volunteers throughout southern Saskatchewan who work to advance philanthropy, held their 2017 National Philanthropy Day Luncheon, presented by Greystone Managed Investments, at the Conexus Arts Centre.

The University of Regina was proud to co-nominate Farm Credit Canada (FCC) for Outstanding Corporate Philanthropist. We were thrilled FCC, whose longstanding partnership with the University spans nearly two decades, was among the recipients taking home the award. With its name prominently displayed on our donor recognition wall at the $500,000 - $499,000 level, the community-minded company follows many philanthropic passions, among which is helping Indigenous students. FCC played a pivotal role in launching the FCC Aboriginal Student Empowerment Fund to support Aboriginal students attending one of five Saskatchewan post-secondary institutions, including the University of Regina. Since its inception in 2011, the fund has provided $350,000 in financial assistance for deserving students with a range of needs. Further illustrating its commitment to the success of Indigenous students, Canada’s leading agricultural lender has also supported the CBC kíispíhtamóníí Aboriginal Mentorship Program, and helped establish the FCC Aboriginal Student Ambassador Award.

“FCC places tremendous value on giving back to the communities where we live and work. Investing in the future of our students is very important to us. We are proud to help students gain the skills they need to be successful,” says CEO of FCC, Mike Hoffort. “When our workplaces reflect our communities, it enriches life for everyone in Saskatchewan. We thank the University of Regina for its partnership and the work it does in promoting diversity.”

We likewise had the honour of nominating fitness advocate Don Millard, BA ’74 who, along with six other commendable individuals, was presented with the Outstanding Individual Volunteer award. Don’s volunteer leadership dates back as far as 1993 when he was involved in Vision 20/20, the University’s first major fundraising campaign to improve facilities, equipment and both faculty and academic program development.

Feeling a special affinity for his alma mater, kííswáci in particular, Don invested countless volunteer hours to help establish the world-class Centre for Kinesiology, Health and Sport. The strong proponent of community involvement also created the Millard KHS FUNdraiser. I am thankful and honoured that the University of Regina has inspired me to contribute in ways that have surprised me with the National Philanthropy Day Outstanding Individual Volunteer award.

On behalf of the University community, we would like to congratulate FCC and Don Millard on receiving their awards. Although National Philanthropy Day is a once-a-year occasion, every day is worth appreciating and celebrating our many donors, whose acts of kindness touch faculty, researchers, staff and students all year long.

Should you ever find yourself in doubt of the true meaning of philanthropy, we suggest you look no further than the names and faces of our donor family, for they are the ones who in our eyes and hearts exemplify it.

- **Undergraduate students:** 13,374
- **Graduate students:** 1,902
- **Amount available in scholarships, awards and bursaries:** $6,044,169
- **Number of scholarships, awards and bursaries given out:** 3,706
MISSION

The University of Regina:
Provides high quality and accessible education, influential research, creative endeavours, and meaningful scholarly experiences in pursuit of local and global contributions to knowledge;
Serves and engages a diversity of students, life-long learners, and communities, with particular emphasis on Aboriginal learners and global citizens;
Offers a welcoming and rewarding academic and work environment for students, faculty, and staff; and
Fosters innovative learning, community engagement, and critical and independent thought.

VALUES

Mutual Respect, Integrity & Honesty
We are a scholarly community engaged with many other communities. The members of our community are our defining resource. Our treatment of each other is principled, open, transparent and respectful.

Inclusivity & Diversity
We are a learning community. We value interaction between faculty members and students as the fundamental activity of the academy. We recognize and support the diversity of our students’ needs, and are inclusive of our Aboriginal, new Canadian, and international students, employees and partners. We aim to be accessible to all who wish to learn with us. We welcome the world to our campuses.

Pursuit of Knowledge
We have a driving urge to know the unknown. Our investigation of and reflection upon varied intellectual pursuits is fundamental to us. We engage our students in these pursuits, seeking to instil in them a life-long quest for knowledge and understanding. We reaffirm our commitment to education in the liberal arts, which is the historic core of our academic offerings. We balance our duty to academic integrity with our commitment to academic freedom in our work and interactions.

Community & Social Responsibility
We employ our expertise to serve each other and society. We illuminate pressing social problems and seek solutions. The knowledge we generate enriches the community. We are legitimately concerned with all aspects of our world. We are a bridge and an interpreter between our communities, other people and other nations.

Accountability & Well-Being
We are accountable for our performance to each other, our students, our alumni and the public. We value a safe, healthy, and supportive community.

VISION

The University of Regina aspires to be a national leader in developing educated contributors, career-ready learners, and global citizens, and in generating meaningful, high-impact scholarship.

STRATEGIC PLAN

Our strategic plan, peyak aski kikawinaw: Together We Are Stronger, focuses on: Student Success, Research Impact, Community Building, Indigenization and Sustainability.

The University of Regina – with campuses located on Treaty 4 and Treaty 6 territories, the ancestral lands of the Cree, Saulteaux, Dakota, and Lakota nations and the homeland of the Métis – is a comprehensive, mid-sized university that traces its roots back to the creation of Regina College in 1911.

Today, more than 15,000 students study within the University’s 10 faculties, 25 academic departments/schools, 18 research centres and institutes, and three federated colleges (Campion College, First Nations University of Canada, and Luther College).

The University of Regina has an established reputation for excellence and innovative programs that lead to undergraduate, graduate, and doctoral degrees. In 2017, the University of Regina was ranked in the Top 200 Best Young Universities in the world by Times Higher Education.
