Hello Everyone,

Please take a moment to read the following reminder regarding personal protective equipment (PPE) requirements in the laboratory. If you have any questions, please contact health.safety@uregina.ca.

Laboratory PPE Requirements:
- **Gloves** must always be worn in the laboratory when handling controlled products and equipment. Gloves must be removed before exiting the laboratory. Wash hands very well.
- **Laboratory coats** must always be worn and completely fastened. Lab coats come in all different shapes and sizes, find one that is comfortable for you.
- **Eye/face protection** must be worn when working with hazardous materials and equipment. Laboratory operating procedures and risk assessments help identify what techniques and procedures require extra protection.
- **Shoes** that cover your whole foot are always required in a laboratory no matter what season. Store appropriate footwear at your desk to change into for all research activities.

Other Laboratory Safety Equipment:
- All UR wet laboratories are equipped with PPE, emergency shower & eyewash stations, first aid kits, fire extinguishers, and spill kits.
- If you do not know where these items are located or are not well versed with these items, PLEASE ask your supervisor or contact health.safety@uregina.ca immediately.

Happy and safe researching!!
