How to Configure RDP to connect from a Windows system to a Windows system

Purpose: Instructions to configure Remote Desktop to connect to an Entra joined computer
Scope: UofR employees
Applicable References: VPN connection required

1. Connect to the UofR VPN as usual
2. Open Remote Desktop as usual
3. Click the down arrow next to "Show Options"
4. Click the “Advanced” tab
5. Click to check the box “Use a web account to sign in to the remote computer”
6. Click the “General” tab
7. Ensure Computer Name has the full path to match your work computer name ‘barcode.dept.uregina.ca’
8. Enter User name as username@uregina.ca (not just your username by itself)
9. Click Connect
