FRED W. ANDERSON

AUGUST 30, 2001

KYLEE-ANNE HINGSTON

REVISED BY STARRY LAI
JUNE 30, 2004

Biographical Sketch:

Fred W. Anderson joined the University of Saskatchewan, Regina College in 1951. He remained a member of the Economics Department until 1983. He was appointed chairman of the department in 1965. Born in Moose Jaw, he received his BA and MA degrees from the University of Saskatchewan and did post-graduate work at the London School of Economics. In 1951 – 1961, he was the Secretary and Research Director to the (Canadian) Royal Commission on Transportation. From 1973 – 1975, he was on leave from the University to organize and launch the Western Transportation Advisory Council. From 1977 – 78, he was Chairman of the Prairie Rail Action Committee, which was created to consider rail lines left undecided in the Hall Commission.

Scope and Content:

This accession consists of various grain and transportation related materials, such as manuals, annual reports, maps, reports and studies. The major portion of the accession is related to the Hall Grain Handling and Transportation Commission, and includes transcripts of the hearings as well as the briefs submitted.

These papers are a compilation of briefs and related materials for the Grain Handling and Transportation Commission of 1975. Emmett Hall was Chief Commissioner with R.E. Forbes, R.H. Cowan, Lloyd Stewart and Reinhold Lehr as members. The Executive Director was J. M. McDonough.

As a result of some of the Commission's findings in regard to rail line abandonment being 'in the grey area' many communities felt that they needed to have a decision made quickly instead of being held in limbo. The Prairie Rail Action Committee was formed to deal with these issues.

Fred W. Anderson was Chairman, Lorne Parker, William Cooper and Jack Gorr were the members. The papers contained are for the communities affected. The papers were compiled by the Commission.

This accession consists of 5.66 m of textual material, including 45 oversize items.

There are no access restrictions on the records.

Related material may be found in 75-10, 80-37, 85-60, 90-15, and 92-56.

Note on the Arrangement:

For the most part, the files are in alphabetical order. However, F. W. Anderson had employed a numerical filing system for the Grain Handling Transportation Commission which was maintained, with the exception that each hearing is organized alphabetically within their Region.

Table of Contents:
