Minutes of the Meeting of
Thursday, March 7, 2019
AH 527

Resource: P. Splett (Research Office), recorder

Guest Speaker: Jérôme Melançon, Special Advisor

1. Introductions

2. Approval of Agenda
   Jones/Harrison – moved approval of the agenda CARRIED

3. Approval of the Minutes from January 8, 2019
   Harrison/Bradley – moved approval of the minutes with minor revision CARRIED

4. Chair’s Report (Raymond Blake)
   The Chair’s report is attached. The Chair advised members that Pam Splett from the Research Office will continue to issue a call to Committee members for agenda items to consider at the upcoming meetings, and that the elected members of CCR will continue to set the agenda for each meeting. The Chair reiterated the importance of staying connected with External Relations and recommended that CCR make it a part of its regular schedule to invite representatives from External Relations to the January meeting of CCR to discuss the importance of including communications about research to the university community and beyond as part of its regular tasks. It is also important that research be an integral part of the University’s communication strategy and the Chair advised that CCR remain vigilant and work to ensure that research activities be considered an important factor in the University of Regina’s Strategic Plan. The CCR committee must have a voice on the ER Communication plan.

5. Business Arising – None.

6. Vice-President (Research) Report – Attached
   The VPR’s written report was circulated with the Agenda package and members had the opportunity to peruse the report before the meeting. The VPR’s Report noted several points, including:
The Provincial Auditor’s Report on Research indicates the University of Regina has implemented all recommendations from the 2013 audit.

Research highlights

7. Terms of Reference for CCR committee – Tabled carried forward.

8. Review performance of the emerging cluster Identity: Living Heritage/Communities (Kathleen Irwin)
   Guest speaker: Jérôme, Special Advisor

Dr. Melançon attended the meeting and provided an update on the recent developments leading to the establishment of a new research cluster, Living Heritage: Identities, Communities, Environments.

In the presentation, the following points were made:

- The Cluster was established in 2016 and having it recognized formally by the University establishes a formal review performance process for the Cluster;
- Members of the Cluster have contributed numerous publications, including many peer reviewed publications and exhibitions, performances and curations. The Cluster will be beneficial to U of R researchers;
- Currently, there are 52 researchers associated with the Cluster representing many different approaches, practices and productions that link directly to community and heritage. Also active within the Cluster are a number of researchers who focus on Indigenization;
- Researchers at First Nations University and Gabriel Dumont Institute are members of the Cluster and will be able to maintain links to Indigenous communities;
- The establishment of the Cluster will better help in building collaborations and partnerships across the University community;
- The Cluster has already exhibited considerable success since it was established in research productivity, scholarship, and performance;
- The Cluster special advisors will continue to engage with VPR on how to make the cluster thrive at the university level and across faculties and institute.

After the presentation, which was well-received, there followed a general discussion. CCR then moved the following motion:

“To establish Living Heritage: Identities, Communities, Environments as a new strategic research cluster at the University of Regina.”

Irwin/Jones — moved to establishment of new cluster CARRIED

9. NSERC – Research Revenue Theme – Comprehensive yearly report – (S. Gray)

As part of CCR’s objective of tracking, Tri-Council Results at the University, Sally Gray, Director, Research Office, presented a comprehensive report on NSERC. The following points were made in the presentation and discussion. A copy of the Report is attached.

- Over-view of Tri-Agency NSERC and NSERC programs and results from 2014-2015 to present were presented;
- Revenue totals are the totals in the year the grant was awarded;

Commented [rb1]: I believe Sally presented a report.
Other Tri-Council results will be considered in subsequent meetings as well as contracts and other contributions to research.

10. Research Challenges - Update (C. Yost)

It has been CCR’s objective throughout the year to identify and report on challenges faced by researchers at the University. As part of that process, Dr. Chris Yost issued a call on the CCAM moodle site to Council Members to submit their experiences on research challenges occurring at the university. Researchers identifies several common challenges that impeded their research activities and output, including:
- The lack of support for graduate, undergraduate and postdoctoral funding opportunities;
- Time required to deal with the bureaucracy and reporting;
- The failure of the University to deal with issues of equity, diversity and inclusion;
- The absence of an adequate research communications strategy to promote the activities and accomplishment of researchers.

The full report is attached and, after discussion, it was agreed the CCR Committee will prioritize the research challenges that has been identified at the next meeting of CCR and prepare a report for the VPR.

11. Direct Open Access Publishing (C. Yost, C. Bradley)

CCR received a written report on Direct Open Access Publishing from C. Yost and C. Bradley. The goal of the report was to give University of Regina faculty, students, and staff an overview of the broader open access publishing landscape, as well as insight into the Canadian and University of Regina contexts, in order to generate discussion and debate about how the University might respond, and ideally lead, in a rapidly changing scholarly publication ecosystem. The report, which is attached, made the following points:

- In 2015, changes were made to publishing journal articles;
- Europe is a clear leader in the field, mandating that research council funding required open access publishing; Canada has not yet developed a policy but will have to do so soon;
- Libraries are aware of coming need for open-access publishing and the increased cost of such changes to publishing research outcomes;
- The implications of Direct Open Access could be costly:
  - Cost $2,300 - $2,500 per journal
  - President Publication fund is less than $10,000
  - Library is working on developing a service;

The report highlighted a number of issues about which the University must be aware in regards to open-access publishing:
- It is an issue for which ACCRU and VP (Research) must begin to develop a policy:
  - The University must be in communication with Tri-Agencies on the matter of open-access publishing and how provides funding;
  - Similarly, the University must be in communications with Provincial Government to make them aware of the impact open-access publishing will have for researchers;
  - The university must also educate non-academia community of this issue and how it may affect them.

The report also identified two issues that will require University attention:
- Violation of copyright
- Predatory publishing
Following discussion, there was a motion “To accept report on Direct Open Access, to append to the Research Challenges, and to forward the report to VP Research.”

Harrison/Irwin — moved to send this report to the VP Research CARRIED

12. Resource Research Impact preliminary report (Jones, Al-Anbagi, Irwin)

The CCR Committee on Resource Research Impact presented a preliminary and oral report. It noted there was concern on acknowledging certain types of research, notably:
  o Indigenous Research;
  o Community-Based Research;
  o Artistic research; and
  o Undergraduate and Graduate student research

In its oral report, it noted the following:
  • The necessity for further development of Indigenous Research which is part of the University’s Research Strategic Plan;
  • The possibility of creating a subcommittee to consult with Human Resources to determine if the Annual Information Forms (AIF) could be used to create a systematic way of reporting research;
  • The necessity of finding ways and means to report student research;
  • The possibility of a creating a publication database within the new Grants Management System;
  • The possibility of streamlining the AIF into the Grants Management system to include research impacts;
  • The necessity of cataloguing research outputs in a meaningful way.

In the discussion that followed, it was noted that it is important that the Board of Governors understand the extent and quality of research the University and fully understand the general research culture at the University. It was noted that there might exist among the Board of Governors a lack of knowledge about the range and diversity of research at the University. It was noted in general discussion that CCR would like to work with the VPR to showcase research activities of faculty and students to the Board. It was noted, too, that the discussion of research performance presented to the Board was more quantitative than qualitative.

13. Volunteers for CFI-JELF review committee
   • Irfan Al-Anbagi and Adrian Pitariu volunteered for this committee.

14. New Business
   • There has been a sudden departure of Bruce Walsh as director of University of Regina Press and a new job posting for Director for U of R Press had been issued. CCR would be updated on the process at the next meeting.

Adjournment
   Irwin/Pitariu – moved to adjourn.
