

# REGINA RDC NEWSLETTER

## JULY 2022

The Regina Research Data Centre Newsletter

July 2022

## SUMMER IS HERE!

Welcome to the Regina RDC Newsletter where we will share news and announcements including educational and funding opportunities, COVID-19 updates, new datasets released in the RDC, new initiatives from Statistics Canada and more! Please share this with your network!

### In This Issue

- [News & Announcements](#)
- [COVID-19 Policies](#)
- [Workstation Bookings](#)
- [RDC Projects](#)
- [New Datasets in the RDC](#)
- [Hours & Closures](#)

### Where to find us?

Innovation Place,  
Room 190  
#2 Research Drive  
Open Monday to Friday  
8:30am - 4:30pm

## News & Announcements

The **CRDCN National Policy Challenge**, in partnership with SAS and Statistics Canada, took place on **June 8**. Recordings of the live sessions are available [here](#).

Academic Director, Dr. Richard MacLennan, along with Regina RDC Analyst, Dr. Jennifer McConnell-Nzunga, led a workshop, ***Analyzing Complex Samples Using Statistics Canada Data***, at the **Canadian Psychological Association (CPA) Conference** in Calgary on June 17. Copies of their presentation are available [here](#).

The **CRDCN and StatCan** are hosting a webinar on Vetting in the RDCs. Submit your questions [here](#) by August 19th to have them included in the session.

Don't miss out on this funding opportunity! The **CRDCN Emerging Scholars Grant** is due **July 31**. More information available [here](#).

New StatCan **Confidentiality Vetting Training Videos** available [here](#).

## COVID-19 Policies

Health Canada has updated its [occupational health guidance](#) in light of the evolving COVID-19 situation. RDCs can return to full capacity, however, **medical grade masks are required when physical distance of 2 metres cannot be maintained.**

## Workstation Bookings

Please email us at [regina.rdc@uregina.ca](mailto:regina.rdc@uregina.ca) to book your workstation. You will receive an email response to confirm your booking.

Bookings must be made by **4:30PM the day prior** to when you plan to come into the RDC. I.E., if you plan to come in Wednesday at 9AM, you must book your workstation by 4:30PM the Tuesday before.

*Keep your eyes peeled for a new workstation booking software coming this fall!*

## New RDC Projects

***A Different Kind of Phobia: Exploring the impacts of initial interventions against Islamophobia.*** Dataset being used: General Social Survey ([GSS](#)) ; PI: Zeinab Ramadan

***A Longitudinal Assessment of Maintenance and New Onset of Chronic pain Conditions in Canadian Military Personnel with and without PTSD.*** Datasets being used: Canadian Community Health Survey - Canadian Forces ([CCHS-CFS](#)) and Canadian Armed Forces Members and Veterans Mental Health Follow-Up ([CAFVMHS](#)) ; PI: Gord Asmundson

***Weapons Use in Saskatchewan.*** Datasets being used: General Social Survey - Canadian's Safety ([GSS](#)) and Uniform Crime Reporting Survey ([UCR](#)); PI: Kim Audette

***The Influence of Temperature Oscillations on Birth and Death Time Series in Provinces and Territories of Canada.*** Datasets being used: [Census](#), Vital Statistics Birth Database ([CVSB](#)), and Vital Statistics Death Database ([CVSD](#)); PI: Arzu Sardarli

## CONGRATULATIONS!

Denae Easton successfully defended her Honours Thesis! Read about Denae's RDC project, *The Relationship between Childhood Victimization and Dating Violence in Canada: An Analysis of the General Social Survey Cycle 34, 2019*, below:

Re-victimization in intimate partner violence situations may occur due to the cyclical nature of violence. Previously, the link between childhood maltreatment and intimate partner violence has been well-researched in the literature. However, there has not been as much research on the relationship between childhood abuse and dating violence, especially in adolescents. In the present study, we used data from the General Social Survey (GSS) cycle 34 - Canadians' Safety (2019) to analyze the relationship between experiencing childhood abuse and becoming a victim of dating violence. The purpose of this project was to examine what factors appear to be associated with dating violence in adolescence and young adulthood. The current study sought to address two principal research questions. The first is: What negative childhood experiences may be contributing to dating violence? This can be divided into a typology of: a) emotional abuse, b) physical abuse, c) sexual abuse, and d) witnessing violence. The second is: Are there other factors that may contribute to dating violence? This includes gender differences, neighbourhood conditions, substance use, and mental health issues. To explore significant relationships among variables, we conducted cross-tabulations, independent samples t-tests, Pearson correlations, as well as multiple and logistic regression models. The findings and implications of this study are discussed.

Angèle Poirier won 1st Place and the Policy Pitch awards at the 2022 CRDCN National Policy Challenge! Her presentation, *What Motivates Recreational Cannabis Consumption in Canada?*, used data from the Survey of Household Spending (SHS) and the National Cannabis Survey (NCS). Her presentation is available to view on the [CRDCN Youtube Channel](#).

# NEW DATASETS IN THE RDC

## CANADIAN COMMUNITY HEALTH SURVEY 2019-2020

The central objective of the **Canadian Community Health Survey (CCHS)** is to gather health-related data at the sub-provincial levels of geography (health region or combined health regions).

## CANADIAN HEALTH SURVEY ON SENIORS 2019-2020

The **Canadian Health Survey on Seniors (CHSS)** is a supplement to the Canadian Community Health Survey (CCHS) - Annual component. It collects information related to health status, health care services, supports, as well as social and health determinants for the Canadian population aged 65 and over.

## EXECUTIVE WORK AND HEALTH SURVEY 2021 *New Survey*

The **Executive Work and Health Survey (EWHS)** provides an assessment of individual and organizational health measures as well as the work environment for federal executives.

## HATE CRIME POLICING INCIDENT PROFILE *New Survey*

The **Hate Crime Policing Incident Profile (HCPIP)** files are the first set of files produced for this Canadian-Sweden Research Collaboration on Organized Violent Threats. To develop the HCPIP files, which identify a cohort of individuals that were involved in police-reported hate crime incidents that occurred between 2011 and 2018, incidents from the Uniform Crime Reporting (UCR) survey were flagged using the hate crime indicator. Unique person identifiers were then created to identify individuals involved in crimes and then all previous and subsequent police-reported incidents of those involved in hate crimes were included.

## IMPACTS OF COVID-19 ON CANADIANS—TESTING AND VACCINATION *New Survey*

The **Impacts of COVID-19 on Canadians - Testing and Vaccination (ICC-TV)** collects data on experiences with testing for COVID-19, particularly with using rapid tests. This information will help assess the rate of at-home COVID-19 testing, access to rapid testing kits in Canada and vaccination status.

## SURVEY ON SAVINGS FOR PERSONS WITH DISABILITIES 2020 *New Survey*

The purpose of the **Survey on Savings for Persons with Disabilities (SSPD)** is to gather information about the knowledge and behaviours of Canadians with disabilities and their caregivers with regard to savings.

## CANADIAN TOBACCO AND NICOTINE SURVEY 2021

The main objective of the **Canadian Tobacco and Nicotine Survey (CTNS)** is to gather information about the prevalence of cigarette smoking, vaping, and cannabis use.

## HOURS & CLOSURES

Please note the following changes and closures. Updates are also posted [here](#).

Monday	Tuesday	Wednesday	Thursday	Friday
<b>August</b>				
1	2	3	4	5
<b>CLOSED</b> <i>Saskatchewan Day</i>	Regular Hours	Regular Hours	Regular Hours	Regular Hours
