

Research Participant Fraud

Rationale

*“Some investigators have found that up to 94% of the responses they have received are fraudulent or invalid, increasing the resources needed to collect accurate data”
(Ménard et al., 2025).*

This happened to us at the CTCRC.
Project 1 - TIPs (survey)
Project 2 - SHRF Impact Grant (focus groups)

Whole Group Discussion: Why is this happening?

Small Group Discussion: Evidence

What evidence do you think might be indicative of participation fraud?
