

Choosing Electives

- review the faculty's webpage and specific department offering the course to learn more about that particular field of study
- ask any friends who have attended UR for any good course recommendations - particularly if they have positive reviews about a particular professor
- shortlist choices based on your personal interests or by how well a particular elective compliments your major (for example - many Bio majors like to take Kinesiology courses for their open electives
- choose an elective that fits well with your schedule

Arts/MAP/Kinesiology Elective Suggestions for B.Sc. Students

CLAS 120 – Latin & Greek in Scientific Terminology

CTCH 110 – Introduction to Creative Technologies

ECON

ENST 200 – Introduction to Environmental Studies

GEOG

HIST 271 – Health, Disease, and the Body: The History of Medicine in Western Culture
