

University
of Regina

DEPARTMENT OF BIOLOGY
Winter 2018 Seminar Schedule
Fridays, 2:30 – 3:30 pm, CL 127

DATE	SPEAKER	TITLE
Jan. 12	Dr. David Sauchyn University of Regina	Industrial applications of paleo-environmental research
Jan. 19	Ryan Oram University of Regina	Masked mysteries: revising Canadian <i>Hylaesus</i> taxonomy
Jan. 26	Dr. Nancy Rabalais Louisiana State University	How does nitrogen from the mid-west of the U.S. cause 'dead zones' in the northern Gulf of Mexico?
Feb. 2	Lindy Whitehouse University of Regina	Coping with changing environments: understanding how lake whitefish respond to stress during development
Feb. 9	Graduate students in progress	Nicole Lerminiaux, Nathanael Bergbusch, Pierre Cockx, Erika Helmond, Kirsten Palmier, Emily Haidl
Feb. 16	Dr. Daniel Schindler University of Washington	From brown water to brown bears: how ecological dynamics respond to geomorphic conditions of river systems in Alaska
Feb. 23	WINTER BREAK	
Mar. 2	Dr. Jackie Webb University of Regina	The role of aquatic environments as hotspots for carbon cycling within agricultural landscapes
Mar. 9	Graduate students in progress	Naveen Sorout, Ruhul Amin, Maria Castilla Bolanos, Leslie Miller, Erin Swerdfeder, Ade Ajayi, Kendra Gietzen
Mar. 16	Dr. Ayush Kumar University of Manitoba	Multidrug resistant <i>Acinetobacter baumannii</i> : leading us to the pre-antibiotic era?
Mar. 23	Carly Graham University of Regina	Population structure of Canada's most harvested freshwater fish: a next generation DNA sequencing perspective
Mar. 30	GOOD FRIDAY	
Apr. 6	Jennifer Russell University of Regina	The antibiotic resistant microbial communities in the Regina wastewater treatment plant
Apr. 13	Dr. Jeremy Fox University of Calgary	Science blogs and their niche in the science communication ecosystem

All faculty, staff, students, and visitors are welcome.
