**The spectral C^* -algebra of
a semigroup of
*-endomorphisms**

October 11, 2013

3.30 to 4.30 p.m.

Research & Innovation Centre 209

Abstract:

Representation theory of the spectral C^* -algebra, an algebra introduced by W. Arveson in 1988, plays an important role in the classification of semigroups of *-endomorphisms. In this presentation, we discuss the structure of this C^* -algebra.
