

GRADUATE SEMINAR

Brian Ketelboeter

Quantum Lévy processes

PhD Student supervised by R. Floricel

Date: Monday, November 28, 2016

Time: 2:30 - 3:30 PM

Room: CW 307.20

Abstract: This talk will provide a gentle introduction to the theory of quantum Lévy processes. We will look at the definition of such processes, discuss their existence and main properties. Time permitting, we will take a look at possible directions of further research.
