

GRADUATE SEMINAR

Ndulaka Uchenna Anthony

Time Series Models

Masters Student supervised by Dr. A. Volodin

November 15, 2018

3.30pm

Math Lounge

Abstract: Time series analysis is the collection of data at specific intervals over a period of time but the analysis and forecasting using this data in some cases may be tedious. Knowing which time series model to be used in data analysis and forecasting makes it easier and interesting. Join us to have a good knowledge of Time Series Models.
