

GRADUATE SEMINAR

Michael Opadotun

Simplicial enrichment of chain complexes

MSc Student supervised by Prof Martin Frankland

April 5, 2021

1:30pm

Zoom: <https://uregina-ca.zoom.us/j/94125367372>

Abstract: Simplicial enrichment of chain complexes can be produced in two different ways using the Dold-Kan correspondence. In my previous presentation, I described one of the enrichments, in this presentation, I will be describing the two enrichments and comparing them.
