

Your Guide to Understanding the Winter 2022 Class Schedule

The following information will help you interpret the Winter 2022 class schedule. Please note that the following examples are snapshots of what you will see in the [Visual Schedule Builder](#) system. If you are using [UR Self-Service](#) to search for courses, you will see the same information as in the examples below but in a different format.

New for Winter 2022

Hybrid – A hybrid class is delivered both on-site in a classroom and remotely. Students who want to take the class on-site will register in a **Hybrid – on-site classroom** class section and students who want to take the class remotely via Zoom will register in a **Hybrid – remote** class section.

Hyflex – A hyflex class is delivered on-site in a classroom and remotely. The key difference that a hyflex class section has from hybrid class sections, is that it allows students to attend either on-site or remotely at will. Students may attend the class section for the entire term on-site or remotely, or attend on-site or remotely as it fits their schedule for the week.

[Quick Index](#)

On-Site Courses	2
Hybrid	2
Hyflex	3
Courses Taught in French	5
Online (Web) Delivered Courses	5
Video-Conferenced Classes	6
Off-Campus Courses (outside of Regina)	7
Multiple Teaching Methods	7

Off-Campus Courses (outside of Regina)

A class section that is being delivered at an off-campus location (outside of Regina) will have the delivery and location information noted within the class section.

As seen in the lecture and lab example below, these class sections are being delivered onsite in Yorkton and are restricted to Parkland College students.
