1.4 How to Search Courses on the Web

- The first step is getting to the Course Catalog online, which is available on the University’s home page at www.uregina.ca. The Course Catalog link is on the UR Self-Service page, which can be accessed by either using the Quicklinks, other menu tags, or by searching Course Catalog using the search function. The Course Catalog can be found at https://banner.uregina.ca/prod/cur/bwckctlg.p_disp_dyn_ctlg.

- Click on “Academic Calendar”. “Academic Calendars & Course Catalog” will appear. Under the heading “Course Catalog”, click on ‘UR Self-Service” and the “Catalog Term” will appear. The catalog term you choose will give you information relevant to that term. You should look at the Term in which you are planning to register.

- Once the term has been selected, click on Submit. This will take you to the Search function. The Subject is the only required field that must be entered. By clicking on one subject, and then, while holding the shift button, on another subject above or below, you can select several subjects at once. Note: You must search by “Subject” (see table above). The output will be the courses that have the selected subject code(s).

- You may wish to submit a Course Number Range.

- If you enter a number into the “from” box, then only that course will be outputted.

- If you enter a number in the “from” box AND the “to” box, both courses, and all courses in between, will be outputted. Note: All output will be in alphabetical order by Subject Code and then by Course Number.

- You may also search by “Title”. You do not have to enter the full title.

- If you search for a word, it will give you ALL titles that contain that word. Note: The search is case sensitive. If you search for MaTH, no courses will be retrieved.

- You may also search by “Level”. If you enter a “Subject”, and then choose “Level Undergrad”, all undergrad courses for the subject will display.

- Lastly, you may search by “Credit range”, that is the number of credits you are looking for, for each course.

- Once your search criteria is placed, select “Get Courses” to retrieve the result.

1.5 Format of Online Course Catalog

The online format is slightly different. Appearing will be the “Subject Code”, “Number”, and a dash with the “Full Course Title”.

Below that will be the “Course Description”, which is the same description as the printed Course Catalog. This is the location where you will see the description, prerequisites, corequisites, approvals, and any special notes.

After the description will be the “Hours”. The “Credit”, “Lecture”, “Lab”, and “Other hours” will be clearly labelled.
Following will be the “Level” of the course, the possible “schedule types”, and the “Faculty” and “Department” to which the course belongs.

The final information on this page is “Course Attributes”. Please ignore this information. It is to be used for future reference and may not currently be held true.

Note: You can click on anything that is underlined.

- You can click on the title which will take you to basically the same page, but shows Registration Restrictions placed on the course.

Note: It is the restriction that is on at the Section level that affects registration (which in most cases is different from that of Catalog).

- A schedule type that is underlined means there are sections scheduled for this course during the semester that you choose as the Catalog Term. If you click on one, you will get a list of the CRNs and the information about the sections for that specific course.

The Self Service Class Schedule works the same and is located in the same area. The only difference is there are more search options and there is more information that relates directly to the section. When searching the Class Schedule, you can get to the course’s Catalog record (to check out the description, prerequisites, co-requisites, approvals needed, notes, etc.) by clicking on the View Catalog Entry link.

Curriculum as Cultural and Social Practice

This course will explore the varied through history, and which are still influenced by a range of constructions of the student, the learner and the school. This course introduces students to historical and foundational knowledge, school and society. This course begins the complex process of constructing teacher knowledge.

Self and Other

This course contributes to students' understanding of their emerging teacher-identities, including the following topics: cultural and psychological discourses producing the roles of teacher; constructs of self and other in relation to difference; and agency in the development of teacher identity. The implications of anti-oppressive and other orientations towards families, communities and schooling are explored.

Constructions of the Student, the Learner and the School

The child, adolescent, adult, student, learner and school are all social constructions: beliefs about people and public institutions which have varied through history, and which are still influenced by a range of theories and perspectives. This course critically examines those constructions over time.

Curriculum as Cultural and Social Practice

This course will engage students in understanding education and curriculum as cultural and social practice. The course will explore the intersections of socioeconomic, political, cultural, geographical, religious, gender and sexual orientation differences with educational and curricular practices as prescribed, negotiated and lived. It will also examine how different teacher, administrator and learner identities are shaped by these practices.

Assessment and Evaluation

Assessment and Evaluation are terms that embody a constructed set of beliefs, values and practices, often taken for granted in education. This course takes a critical look at the construction and practice of assessment and evaluation in the context of teaching and learning.
and helps prepare pre-service teachers to practice fair and equitable assessment and evaluation.
